- 4 PHA IPM CEU's available

Carol Goodwin, former Associate Professor in the Department of Environmental Sciences at Dalhousie University Faculty of Agriculture

We will teach you how to tell one conifer from another, how to tell deciduous trees and shrubs apart, and about various groups of perennials. The plants described will be from the Certification list for Plant ID and Plant Sensitivity. We'll then explore the different types of damage insects can do, and how to recognize beneficial insects. We'll finish by looking at the appearance of environmental damage and cultural injury on plants.

Who should come

- Garden centre staff.
- Landscape maintenance crew and leaders
- Nursery workers.
- Municipal Parks and Recreation Workers
- Landscape installation front line workers & foreman.
- Anyone with an interest in plants
