# Star Guardians

## New Systems, Weapons, And Attributes

### Personality Traits

#### <u>Magician</u>

A Magician may have from one to four of the following spells. A The Magician trait's base cost without spells is 15 points.

Spells marked with an '\*' may be used outside of the Personality's normal activation. Up to two spells may be used per game turn, and no spell may be used more than once per turn. When not specifically noted, a spell lasts until the end of the game turn in which it was cast.

Foresight \*: Forces the re-roll of any single Combat-related dice roll made by any unit within 12". Cost: 15 points.

Hide: Adds two to a single Personnel unit/vehicle's Defense/To Hit numbers when targeted within 6" of the Personality's position. 15 points

*Psychic Blast:* See the Emperor's Legions document for rules and effects. Cost: 25 points.

*Psychic War:* Allows the Personality to initiate CC against any enemy unit with Psychic attributes that is within 12" of its current position. The Personality forgoes any ranged fire attacks and may not initiate 'normal' CC during the same turn. Use 2 x d10 for each round of this CC, using only the higher of the two die rolls. Cost: 20 points.

Quicken: Adds one to a single CC/CA dice total to any friendly unit within 6". 10 points

Resolve: Makes a single friendly unit within 6" Fearless. 10 points.

Storm: Creates d3 Smoke markers within 6" of the Personality's position. Cost 10 points.

Summon: Calls an Avatar into the game on a successful CQ roll, which deploys within 4" of the Personality. Cost: 40 points; counts as two spells toward limit, and may only be used once per game.

#### Seer

During the Initiative Phase, immediately after EW Allocation, an unsuppressed/unbroken Seer Personality may take an unmodified CQ test. If he passes the test, roll a d3. The result is the number of enemy units within 24" of the Seer that must reveal their EW assignments AND have orders assigned prior to resuming the normal turn sequence [see Strike Force: The Clockwork Armies, section 8.1]. Cost: 75 points.

#### New Weapons

<u>AP Missile (AMSL):</u> AP Missiles are missile weapons that specifically target Personnel or Soft vehicle targets, have no effect on armored targets, and may not be fired at Air/STOVL elements. Cost and restrictions are as per ATM/AAM for the fielding element. TL5

#### New Attributes

<u>Teleport</u>: The unit may teleport up to its normal movement allowance instead of using its normal type of mobility. Teleport movement may be used in conjunction with Hit and Run. Cost: 40 points/team. TL7.

#### Star Guardians Platoon Organizations

Guardian Platoon: two to four Guardian squads of 2 to 4 teams each, plus one Leader Team. 2-team squads may be mounted in a Serpent [A, B, or C] IFV.

<u>Support Platoon:</u> two Guardian squads of 2 to 4 teams each, plus two squads of two Weapons Platforms each, and one Leader Team. <u>Specialist Platoon:</u> two squads of two teams each of any but Wraithlords, plus one Leader Team. All non-Walker/non-Assist squads may be mounted in a Serpent (A,B, or C) IFV).

Wraithlord Platoon: two Wraithlord teams.

Tank Platoon: three identical tanks.

<u>Heavy Platoon:</u>one Heavy Tank or Megawalker.

<u>Aerospace Section:</u> Two Firebird Bombers or Vampire Fighters.

#### **Company Organizations**

<u>Infantry Company:</u> two Guardian or Support Platoons, plus up to two Specialist Platoons of any type and two Leader Teams. <u>Jetbike Company: two</u> or three platoons of Jetbikes or Vyper Jetbikes and one Leader Team. <u>Wraithlord Company:</u> three Wraithlord platoons.

#### Personality Limitations

A maximum of one Monarch, one Prince, and one Farseer may be in a single force.

One Warlock or Witch may be added for each two Infantry companies in play.

One Champion may be added to each Specialist Platoon in play. The Champion must use the same type of mobility as the Specialist troops to which he will be added.

#### Special Rules

All Guardian and vehicle formations use Trained CQ; all other unit types use Veteran CQ. All Space Elves use Lacking C2 ratings.

All Tank and Heavy platoons are deployed and operate as independent platoons. Heavy Tanks and Megawalkers are always In Command.

The Avatar, if in play, has the CCW (he may choose a CC die one higher than he pays for in Life Points), Hit and Run, and Power Weapon attributes. IT may be damaged in CC only by a unit with the Power Weapons attribute, and loses one Life Point per K result (K1=1 Life Point, K2 = 2 Life Points, etc.).

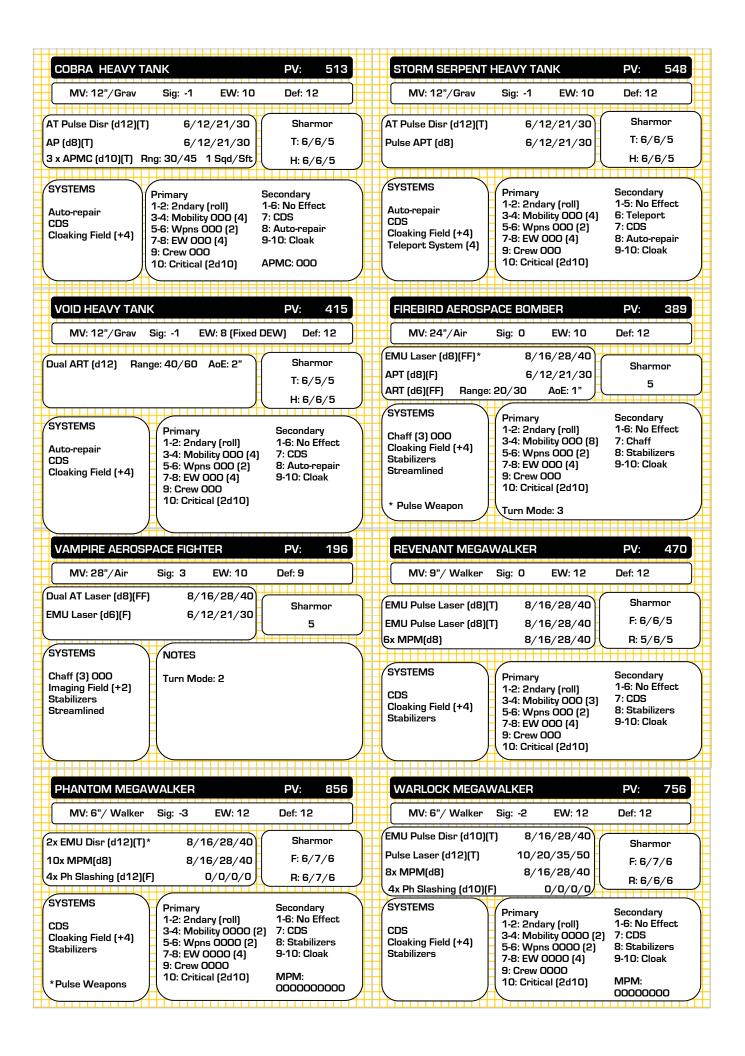

If an Avatar is destroyed, all friendly units within 18" must take an immediate CQ test, adding two to their target number. Failure of this test results in the unit/vehicle being Suppressed.

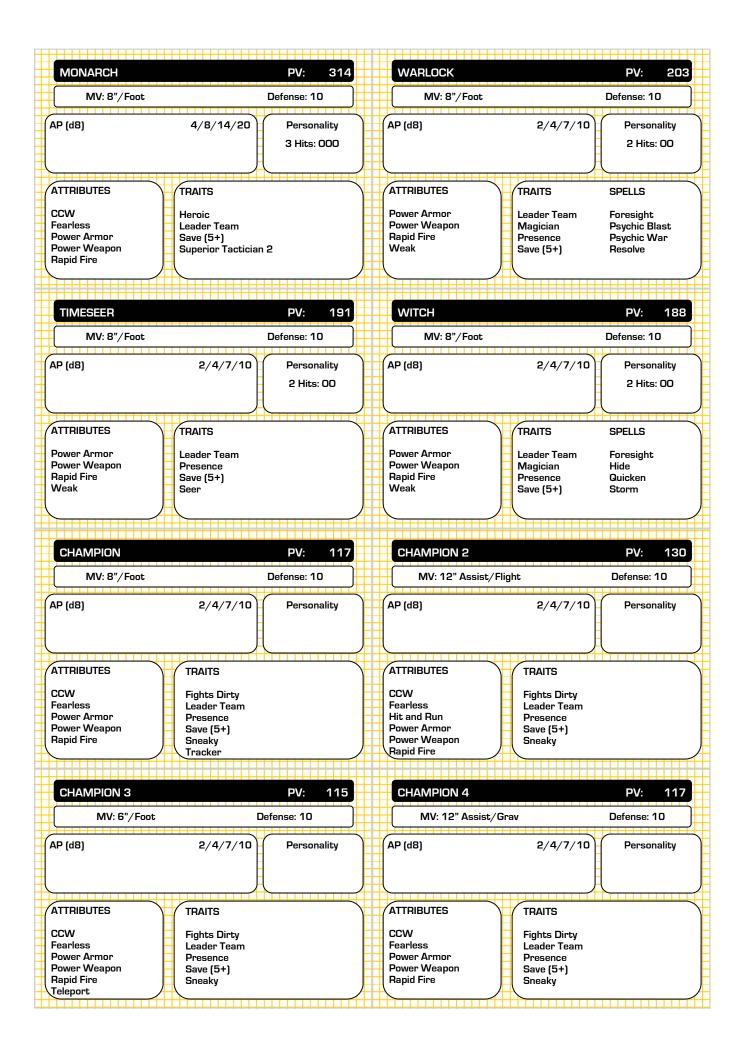

A maximum of one Avatar may be in a single game, whether deployed at-start or Summoned. The point cost of a Summoned Avatar is added to the total point value of the at-start force.

Special Rules (continued)			
	-	SPACE ELVES ORTILLERY	

The Avatar, if in play, has the CCW (he may choose a CC die one higher than he pays for in Life Points), Hit and Run, and Power Weapon attributes. IT may be damaged in CC only by a unit with the Power Weapons attribute, and loses one Life Point per K result [K1=1 Life Point, K2 = 2 Life Points, etc.].

If an Avatar is destroyed, all friendly units within 18" must take an immediate CQ test, adding two to their target number. Failure of this test results in the unit/vehicle being Suppressed.

A maximum of one Avatar may be in a single game, whether deployed at-start or Summoned. The point cost of a Summoned Avatar is added to the total point value of the at-start force.
