To whom it may concern:

As one of the oncologists of the Coastal Integrative Cancer Care in San Luis Obispo, we feel fortunate to have The Wellness Kitchen and the Cancer Well-fit programs in our county in which to refer our patients. We believe in an integrative approach for our patients that includes the importance of strength building as well as mineral-rich nutrition and hydration.

Giving The Wellness Kitchen and Cancer Well-fit Programs the opportunity to offer even more services to our community, especially our underprivileged patients in need would be a true blessing. These organizations are active in partnering with other cancer support providers throughout the county, including the Center for Family Strengthening, a health education outreach program which provides bilingual Community Health Workers, to assist in reducing language barriers and access to healthcare.

We hope you will give serious consideration in granting these two proven groups with funds to continue the good work they're doing for our communities.

Sincerely,

Brian DiCarlo, M.D.
