

## VFW QUILT BED COVER Twin size

These are used at all veteran homes by the residents as their personal bed cover.

❖ **There are several ways to make the bed cover:**

- The minimum needs to be 63" x 87" and should be no larger than 72" x 96".
1. These could be as simple as TWO coordinated, colorful bed sheets layered with quilt batting; tied and hemmed all around.
  2. These could be colorful squares of coordinatng fabric stitched together for the TOP, and a colored bed sheet for the bottom, layered with quilt batting; tied, and hemmed all around.
  3. Long arm quilts are machine quilted, requiring more time and effort.
  4. "End of life" quilt is used by residents in hospice care and remains with this resident or family until the end of this life. This is a touching tribute to their contribution and a way to say Thank you.
