

Sustainable Coils

Replacement Coil Solutions!

**Trane/American Standard Air Handler replacement coil cross reference:
7/17/17**

Suction line height referenced in the cross reference notes is measured from bottom of drain pan. Add 3" if measuring from the bottom of the filter rack.

Some 2/4TEC, 2/4TEE and 2/4TEH models do not match the manufacturers published specifications for suction line height. There were also later revisions of the 4TEC 3.5 and 4 ton units that retained the same part numbers as earlier versions that deviate from published specifications.

It is always best to field verify header height dimensions before placing your order for TWE replacement models. If the notes denote "Requires header modification" the Sustainable model listed is used for your application but the line set location may not match the access panel. To insure that the header will match your access panel, the suction line would need to be modified in the field.

Trane/A.S. Model #	Sustainable Model #	Suction Line Height-Notes
