

Cost and Support for SABER

There is no payment made to SABER for participating. You may incur costs for the connector to SABER, but many of those are available at no cost. Using the Google Earth® and the ESRI ArcGIS Online® applications, and some other mapping applications, vary from no cost to little cost. The UICDS middleware was developed by DHS Directorate of Science and Technology and is now operated by a non-profit and provided for government use at no cost. SABER's use of UICDS falls into the no cost category. The Organizing Committee members volunteer their time to SABER.
