Louver Magic  
vertical  
blinds

# When quality counts, the choice is Louver Magic!

People with discriminating taste have always sought out excellence in their lifestyles and environmental choices. And Louver Magic has developed a vertical blind system with excellence you can see, touch and use. The quality of the entire system – rod model, cord model, remote motorized – from its state-of-the-art track, carrier and self-adjusting hangers have been engineered to assure you of high performance and lasting beauty. There is a vertical blind system for almost any window application, and a range of fabric and color selection to satisfy the most demanding customer.

- Louver Magic offers its unique one-control system for off-center splits.
- Controls on both ends (optional) for expansive stretches of verticals.
- One-control bay window application.
- Multiple opening on one head with fully operable single control.

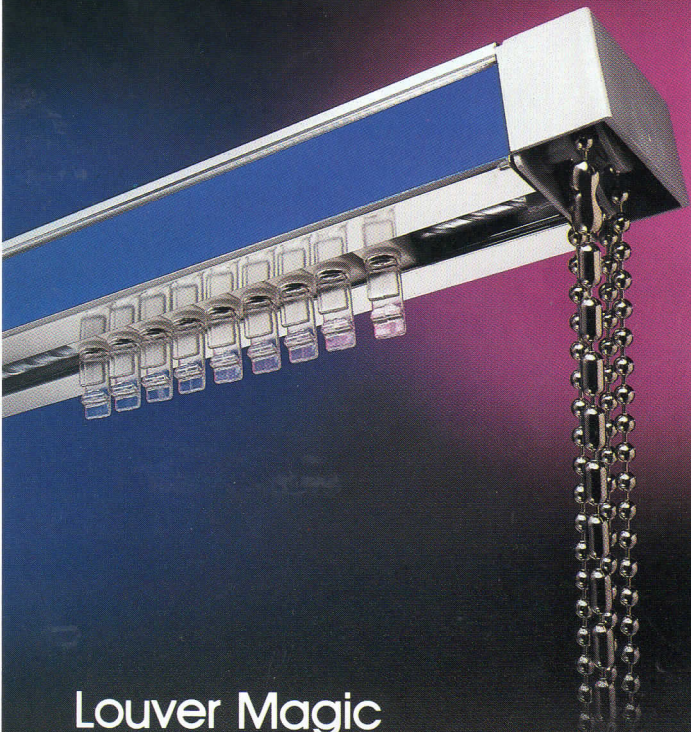

1. Top of track is designed to hide installation bracket and accept snap-in valance clip.
2. Non-stretch nylon cord.
3. Clear Hanger will not contrast with louver. Its special design allows for easy insertion and removal of vanes.

1. Decorative End Cap adds a finished touch to end of headrail.
2. Heavy Duty No. 10 Bead Chain for smooth operation and strength.
3. Heavy-Duty Aluminum Tilt Rod
4. Spiral Traverse Rod provides smooth mechanical traversing.
5. Even spacing between louvers, using full hard stainless steel connectors, eliminates excessive overlap at ends of track.
6. Master Carrier designed to allow complete traversing on any window condition.
7. Self-Lubricating Wheels.
8. Self-Adjusting Hanger permits automatic realignment of louvers.
9. Headrail can be color coordinated with louvers, using either the flat or grooved side. (Valance optional)
10. Rod model available with Louver Magic's customized motors, remote or manual.
