Purpose of Market Animal Projects

- 1. To acquire understanding of market animal production by preparing for an animal, purchasing it, caring for it with best management practices and keeping accurate records.
- 2. To be able to identify the types and grades of your project animal and to employ efficient methods of marketing the animal to potential buyers.
- 3. To understand the business aspects and economics of purchasing animals, feed, facilities and equipment needed for a market animal project.
- 5. To develop leadership abilities, build character, and to assume citizenship responsibilities as an ambassador for the livestock reproduction community.

Project Animal Inventory

Identify your project animal during this project year. Animals sold should have a \$0 value at end of project.

- Beginning \$ Value: Purchase cost of new animal.
- \$ Value at end of project: Animals sold should have a \$0 value at end of project. Animals kept should have market value assigned to them.

Health Record

The Health Record includes all health-related activities (vet services, de-worming, medicated feeds with withdrawal times, and vaccinations). You should include the dates of treatment, what treatment was used, how it was administered, and the purpose of the treatment. Include standard animal care such as health certificates. If you did none of the above mentioned please note accordingly.

Market Weight Record

3 Weights must be recorded, including date of acquisition and check-in day. Complete the table of the recorded weights and determine the Average Daily Gain. Knowing how much your animal is gaining each day is essential to raising a healthy production animal. Weights can be measured using scales, weight tapes, or estimated.

*Use a calendar to accurately determine the number of days between weights.
