To My Sleep Medicine Patients:

This letter is written with mixed emotions. I will be retiring from my sleep medicine and internal medicine practice on December 31, 2019. I am honored to have been able to share your medical care with you.

It is important for you to make arrangements to continue to receive quality medical care. I do recommend Drs. Obaid Rehman, Ryan Moody, Michael Mullins, and Maria Mascolo. They are all board certified in sleep medicine and are excellent physicians. Please discuss your options with your primary care physician or healthcare provider.

Patients may obtain a copy of their medical records by accessing our patient portal. If you do not have access to the portal, please contact our office for instructions. We will send records to a physician of your choice with a signed release. There will be a standard charge for copying records. Records will be available until December 31, 2019.

Furthermore, I will coordinate follow-up for my superb group of "Inspire" patients and help place them with an appropriate sleep specialist. Thank you for your commitment, trust, and hard work to make this an exciting and successful program!

To my many patients who suffer from excessive sleepiness due to diseases such as narcolepsy, please be sure you have assessed your stimulant medication needs and communicated with us. No prescriptions will be written after December 31, 2019. Please be aware that your primary physician or new sleep medicine physician may have a different view regarding the type and amount of stimulant you require.

Once again, I thank you for allowing me to have participated in your health care. I wish you the best of good health and comfortable, restorative sleep.

Sincerely,

ANTHONY M. COSTRINI, MD, MA, FACP
