

# Social Leaders are Alive for Environmental Sustainability

Rudrarup Gupta

*Commercial Manager, Multifarious Projects Group and Overseas Editor/Reviewer, American Institute of Science, USA*

**Abstract** - It is really needless to say that, environment signifies the situated realm. Moreover it is undoubtedly derived by nature. The environment incorporates physical, social, natural and cosmic elements altogether. In other words we do cherish plenty of living organisms, who responds as per the environmental need always. Light, air, trees, oxygen, soil, water every individual attribute does reform a proper climate, where we the most rational human being do live with an infinite hope in the near future. Entire mankind move and enjoy the environmental nicety by those unavoidable attributes, which are really immortal in nature and those are equally pivotal to ensure the glorious span of life with joy, acceptance and high-end satisfaction respectively. That is how the environmental jollity is established, when both physical and mental harmony are completely satisfied through some living charm now. On the other hand environment creates the undiminished culture not only to create an identity but to construct a purposeful society in a beatific style.

**Keywords** - *Societal Glory, Cultural Merriment, Environmental Sustainability, United Nature.*

## I. INTRODUCTION

Environmental Sustainability is a vast concept, which is to be conceptualized in all over the globe within a very short while. It enriches the socio economic infrastructure and in the same light social development and the best social affluence is minutely evaluated for sustaining the development. It is having some worthwhile objectives, which are as follows:

- **Solid Infrastructure:** This sustainability is very helpful for the future generation. Because this environmental radiance fulfills the social, cultural and environmental needs respectively. This is why mankind has the needful shelter in their living environment. So they can be alive with an integrated approach in a long term.
- **The Natural Glee:** It is one of the important factors to sustain in a felicitous environment already. It is quite evident that, each one of us has to adopt the new environment and overcome the social needs accordingly. So that, it shall be very easier for them to contribute for the society and to inspire the next generation without any second thought.
- **Population Control:** It is really very true that, if the population is beyond the limit then the huge environmental resources are required. In other words environment needs the sufficient industrial glamour for all the common people to ensure their

occupational involvement there. This process should be really continued to achieve the huge population and to secure the needful resources throughout the year.

- **Movement:** As per my envisage movement is a very decisive factor for this sustainability. But since the modern technology has arrived in this present civilization that is why more vehicles are required now a day as per the volume of population. But it might cause the air pollution here. So high technology is firmly needed to stop this pollution and fetch the peace in our environment.
- **United Society:** Environment creates the culture and culture builds the society. Therefore the major involvement is truly conducive, which is exclusively possible through a painstaking celerity of an unblemished environment.

## II. IMPORTANCE OF ENVIRONMENTAL SUSTAINABILITY

Environmental superiority largely depends upon the environment. Moreover crop cultivation is one of the essential factors to generate the precious earning for rural fellows. But it consists of certain factors, which are as follows:

- **Continual Cultivation:** We are all looking at the drastic environmental change. On the other hand cultivation is one of the promising occupations in India. But due to this drastic change the process of cultivation is having some serious problems in deed. As a result most of the cultivators are not in a prior position to cultivate and to lead their life as well.
- **Agreeable Human Culture:** Very important to drive the rational society. Any proper culture is really conducive to form a society and to assure the day-to-day activities as well. So the proper environment has to sustain for long for the wide welfare of our growing society.
- **Educational Brilliance:** As per my surmise the environment should be such as if we can have the great educational

magnificence here. So that, we shall be able to fabricate the scholarly society and to stimulate students for their needful academic brilliance for a secured occupational future.

- Prompt Understanding: Noteworthy social change matters a lot. If that is positive in nature then it creates the understanding with each and other just not to alive in that society but to innovate something very striking for an everlasting welfare of the same.

### III. CONTRIBUTION OF SOCIAL LEADERS FOR ENVIRONMENTAL SUSTAINABILITY

Environmental practice is a massive subject for an encyclopedic research. Mankind and the realistic application of mankind are equally associated with this. Moreover social leaders are playing a very promising role to reform some fabulous opportunities of employment as soon as possible. So that, the destined environmental glee shall be maintained in a respectful manner. Moreover a number of people shall have the winsome professional opportunities as per their qualification and caliber as well amongst this huge population. This is very important at all. So social leaders shall be able to supervise those people as per their present day need.

- Motivation: Social Leaders are highly responsible to inspire the entire society about the supreme employment opportunity and the rapid environmental change in deed. As a result they are capitalizing their talent and absorbing them with the new environment.
- Metamorphosis of Technology: Leaders are following the community leadership approach here. Because this is absolutely a common goal to reach for the entire individual. In that case they are bringing out some new technology, which shall be truly conducive to ensure a positive mind frame for a glorious employability in the near future.
- Amicable System: This system may help to those leaders for adopting the new environment in all the regards. On the other hand this system shall generate the additional energy to that society to be really active and result oriented.

### IV. CONCLUSION

Social Leaders are solely responsible for the environmental sustainability and to construct a democratic paradigm respectively. It is going to be praiseworthy for an astounding

environmental acceleration, where social leaders shall display us the shiny environmental omnipotence to spark the social actuality and the sustainability with an undying hope of communal synthesis.
