

# Sweeny Community Hospital Specialty Clinic

## MARCH 2019

MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
	<p><b>Everyone ages 50 to 75 needs to get screened for colorectal cancer. Screening saves lives because it can help catch cancer early, when it's easier to treat.</b></p>	<p><b>There are 3 main types of colorectal cancer screening tests: colonoscopy, flexible sigmoidoscopy, and stool tests. Each test has pros and cons.</b></p>	<p><b>Find out which test you might prefer then share the results with your doctor. Together, you and your doctor can choose the best test for you.</b></p>	<b>1</b>
