Chairman Angelo Tabanelli called the meeting to order at 10:00AM, and then asked the Secretary to read the minutes of the previous meeting. These were read and approved.

The Secretary read a list of all notices of intent received since the previous meeting.

Mr. Zelenka asked if another highway permit is required on relocation. A discussion of the matter revealed that some State Road Department District offices did require another permit, and that others did not. Mr. Jack Swaine offered to try to get a definite ruling on this for the committee.

On the matter of relocations for Interstate Highways Mr. Swaine informed the group that in the future the Utilities involved will be furnished with two sets of construction plans. One of these sets are to be marked with existing and proposed facilities, and returned to Mr. Swaine's office for approval.

Southern Bell Telephone and Telegraph Company's new Micro-wave link between Jacksonville and Thomasville was outlined briefly by Mr. Stanley Warth. He explained that this link completed a 3000 message circuit between Jacksonville, Florida and Mobile, Alabama.

Mr. E. J. O'Connor discussed some of the problems involved in underground distribution of power within new residential subdivisions.

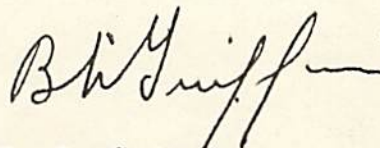

A very interesting film entitled "Rescue Breathing" was presented by Mr. Stanley Warth. The film outlined the method of administering insufflation.

The group was invited by Mr. Ralph Oswald to hold its next meeting in Leesburg, Florida. This invitation was accepted, and the next meeting will be held there on August 12, 1960.

The meeting was then adjourned, and the group enjoyed a delicious lunch as guests of the Southern Bell Telephone & Telegraph Company and the American Telephone and Telegraph Company.

Respectfully submitted,

B. L. Griffin
Secretary
