Dr. Randy M & W: 9-1
T & Th: 3-8

Dr. Gerry M: 1-8
W: 1-8
F: 9-5
S: 9-1

Welcome Back!!!

We're so glad to see you!! Many of you, as you have been trickling back in, have said you didn't realize that we were open. In fact, we were open all along. From the very beginning we were deemed essential... not that we needed anyone to tell US that!!!

Chiropractic addresses the misalignments that create distortion in your nerve system and keep your body from working as efficiently as it could and should (i.e., vertebral subluxation).

When vertebral subluxation is present, your body cannot adapt as it should. That is a significant problem. The difference between you and a corpse at the morgue IS your ability to ADAPT.

Corpses have arms and legs and hearts and brains. However they lack the ability to express the principle of active organization. They do not adapt at all. You cut a corpse, it doesn't make new skin. YOU DO!!! You put a corpse in the heat, it gets hot. You will stay at a relatively constant temperature!!!

Vertebral subluxation inhibits or distorts the expression of the principle of active organization. You are not dead, but you are not fully ALIVE, fully animated, and fully able to ADAPT.

And with everything going on in our world today, you have never needed to adapt as much, as quickly, and as efficiently as you TODAY!!!

More importantly, vertebral subluxation occurs in epidemic proportions due to the multitude of physical, chemical and emotional stresses we all encounter every day!! And that was BEFORE the world got turned upside-down!!!

Our message hasn't changed in 52 years!!! You are beating up your body EVERY day! Sometimes the assault comes from things you'd rather avoid (e.g., car accidents, physical work... think painters, mechanics, hairdressers.) However, sometimes it comes from things you want or like to do (e.g., lifting weights, running, roller coasters.)

Whatever the stresses, having your spine checked on a regular basis is ESSENTIAL if you hope to be your best you and live your best life. If you hope to adapt as fully as possible in an ever-changing world!!!

This is why, when things got crazy this past March, we did NOT close. We stayed here to be available to everyone who understands the importance of regular, ongoing chiropractic care for themselves and their families.

After 52 years, we couldn't cut and run when things got as stressful as ever. You need our care MORE NOW THAN EVER!!! And we are so glad to be here for you!

Welcome back. We're so glad you're here!

**“ADAPTATION IS OF PRIME
IMPORTANCE IN CHIROPRACTIC.
THE PURPOSE OF THIS PROFESSION
IS TO ENABLE THE BODY TO
ADAPT MORE EFFECTIVELY BY
REMOVING NERVE INTERFERENCE
AT THE VERTEBRAL LEVEL.”**

- Joseph Strauss, D.C.
