Comments from recent trainings:

"GA UNUM should save time and increase productivity"

As a result of using UNUM, "I will be more efficient and not worried about being in compliance."

What did you like most? "How it will save time and protect me."

BOTTOM LINE?

Unum represents a great leap forward for Clinical Evaluators in terms of gathering client data and creating reports. Once you become familiar with the application the benefits of Unum will become clear.

HOW MUCH DOES IT COST TO USE UNUM?

The cost of the Unum Document Management System is based on the number of unique client records created within the application. Each Client Record will be billed at \$13. To ease any financial burden on users of the Unum application, DBHDD is allowing for this to be added to the existing fee structure, allowing providers to set their own cost for the Client Record. Therefore, the application will be cost-neutral for the provider. This will allow you to take advantage of all the fantastic features of the application, save significant time and money, at no extra expense to you.

Thank you for your cooperation. Please let us know if you have any questions, using the contact information below.
