

OPPD Monthly Reports
Cougar Electric Car
February 2014

Car: A30	<p>The A30 car team has been working very hard this month; they worked on many things from the tail to the nose to make it more aerodynamic. While working on putting fiberglass onto the tail, adding plastic where needed to make it more aerodynamic. The team is working on adjusting the pedals so that both short and tall drivers can easily drive it. The future thoughts of the A30 team will be to make the car more aerodynamic and to finish up the retouches so they can test it.</p>
Car: S40	<p>The S40 Car team has been working through the frame and body of the car this month. First, it was putting the axle onto the car and welding the control mount onto the car. We are in the process of putting on the wheels and attaching the steering mount into the car. The future plans of the S40 car and its team are to finish the car.</p>
Car: S50	<p>The S50 car team has been working on welding the frame, motor mount, and mounting points onto the swing arm. While they are working on finishing the axle, fiberglass is being added to the body of the car, and the opening of the car is being cut out. The future plans of the S50 car are finishing the car and putting it out to test.</p>
