\*Note- Team scores were determined by the following process:

I took the total team handicap and subtracted the number of pops used on the first 6 holes. I then took 50% of the remaining handicap to determine a final score.

Example: Carruthers/Hollabaugh had a combined handicap of 29. 10 pops were used on the 1<sup>st</sup> six holes. The remaining 19 pops were divided in half to give a 9.5 handicap.
