INSTRUCTIONS FOR FEEDING

The fiber sources in Patriot Ultra-Fiber are highly digestible in horses and contribute significantly to the digestible energy content of this feed. Feed 5-6 lbs of Patriot Ultra-Fiber to an average sized, mature horse (900-1200 lbs) along with at least 20 lbs of good-quality forage divided into at least two meals each day. Adjust feeding rate for each individual horse to maintain the desired body condition. If your horse needs less than 5 lbs of Patriot Ultra-Fiber to maintain condition, provide a GROSTRONG Vitamin and Mineral product according to label directions. If more energy is required when feeding 6 lbs of Patriot Ultra-Fiber, add a Hi-Fat Supplement from the Forage First® Nutritional Pyramid. GROSTRONG Mineral products should also be offered to performance horses and broodmares on a free choice basis. Provide clean, palatable water at all times. See bag for additional details. For more information, call 1-800-680-8254.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.
