Why I Believe in Project Based Learning

Allows me to be extremely open-minded and avoid using the word “no”.

Projects are a way for me to scaffold learning while allowing students to interject their own ideas and make it personal.

Allows for creativity.

Helps students to identify talents and passion.

Biker Build-Off

Students are responsible for all aspects of the build including, teardown, research and ordering parts, new parts inventory and inspection, and assembly. (Often times this includes the engine)

What the students learn

Team work

Basic use of hand tools

Safety

Small Engine repair

Finance (comparison shopping)

Problem solving
and more!

Green Screen Studio

What the students learn from the project.

Digital Editing
Storyboarding
Camera Lighting
Background
Sound/Recording
Camera shooting angles

Entrepreneurship

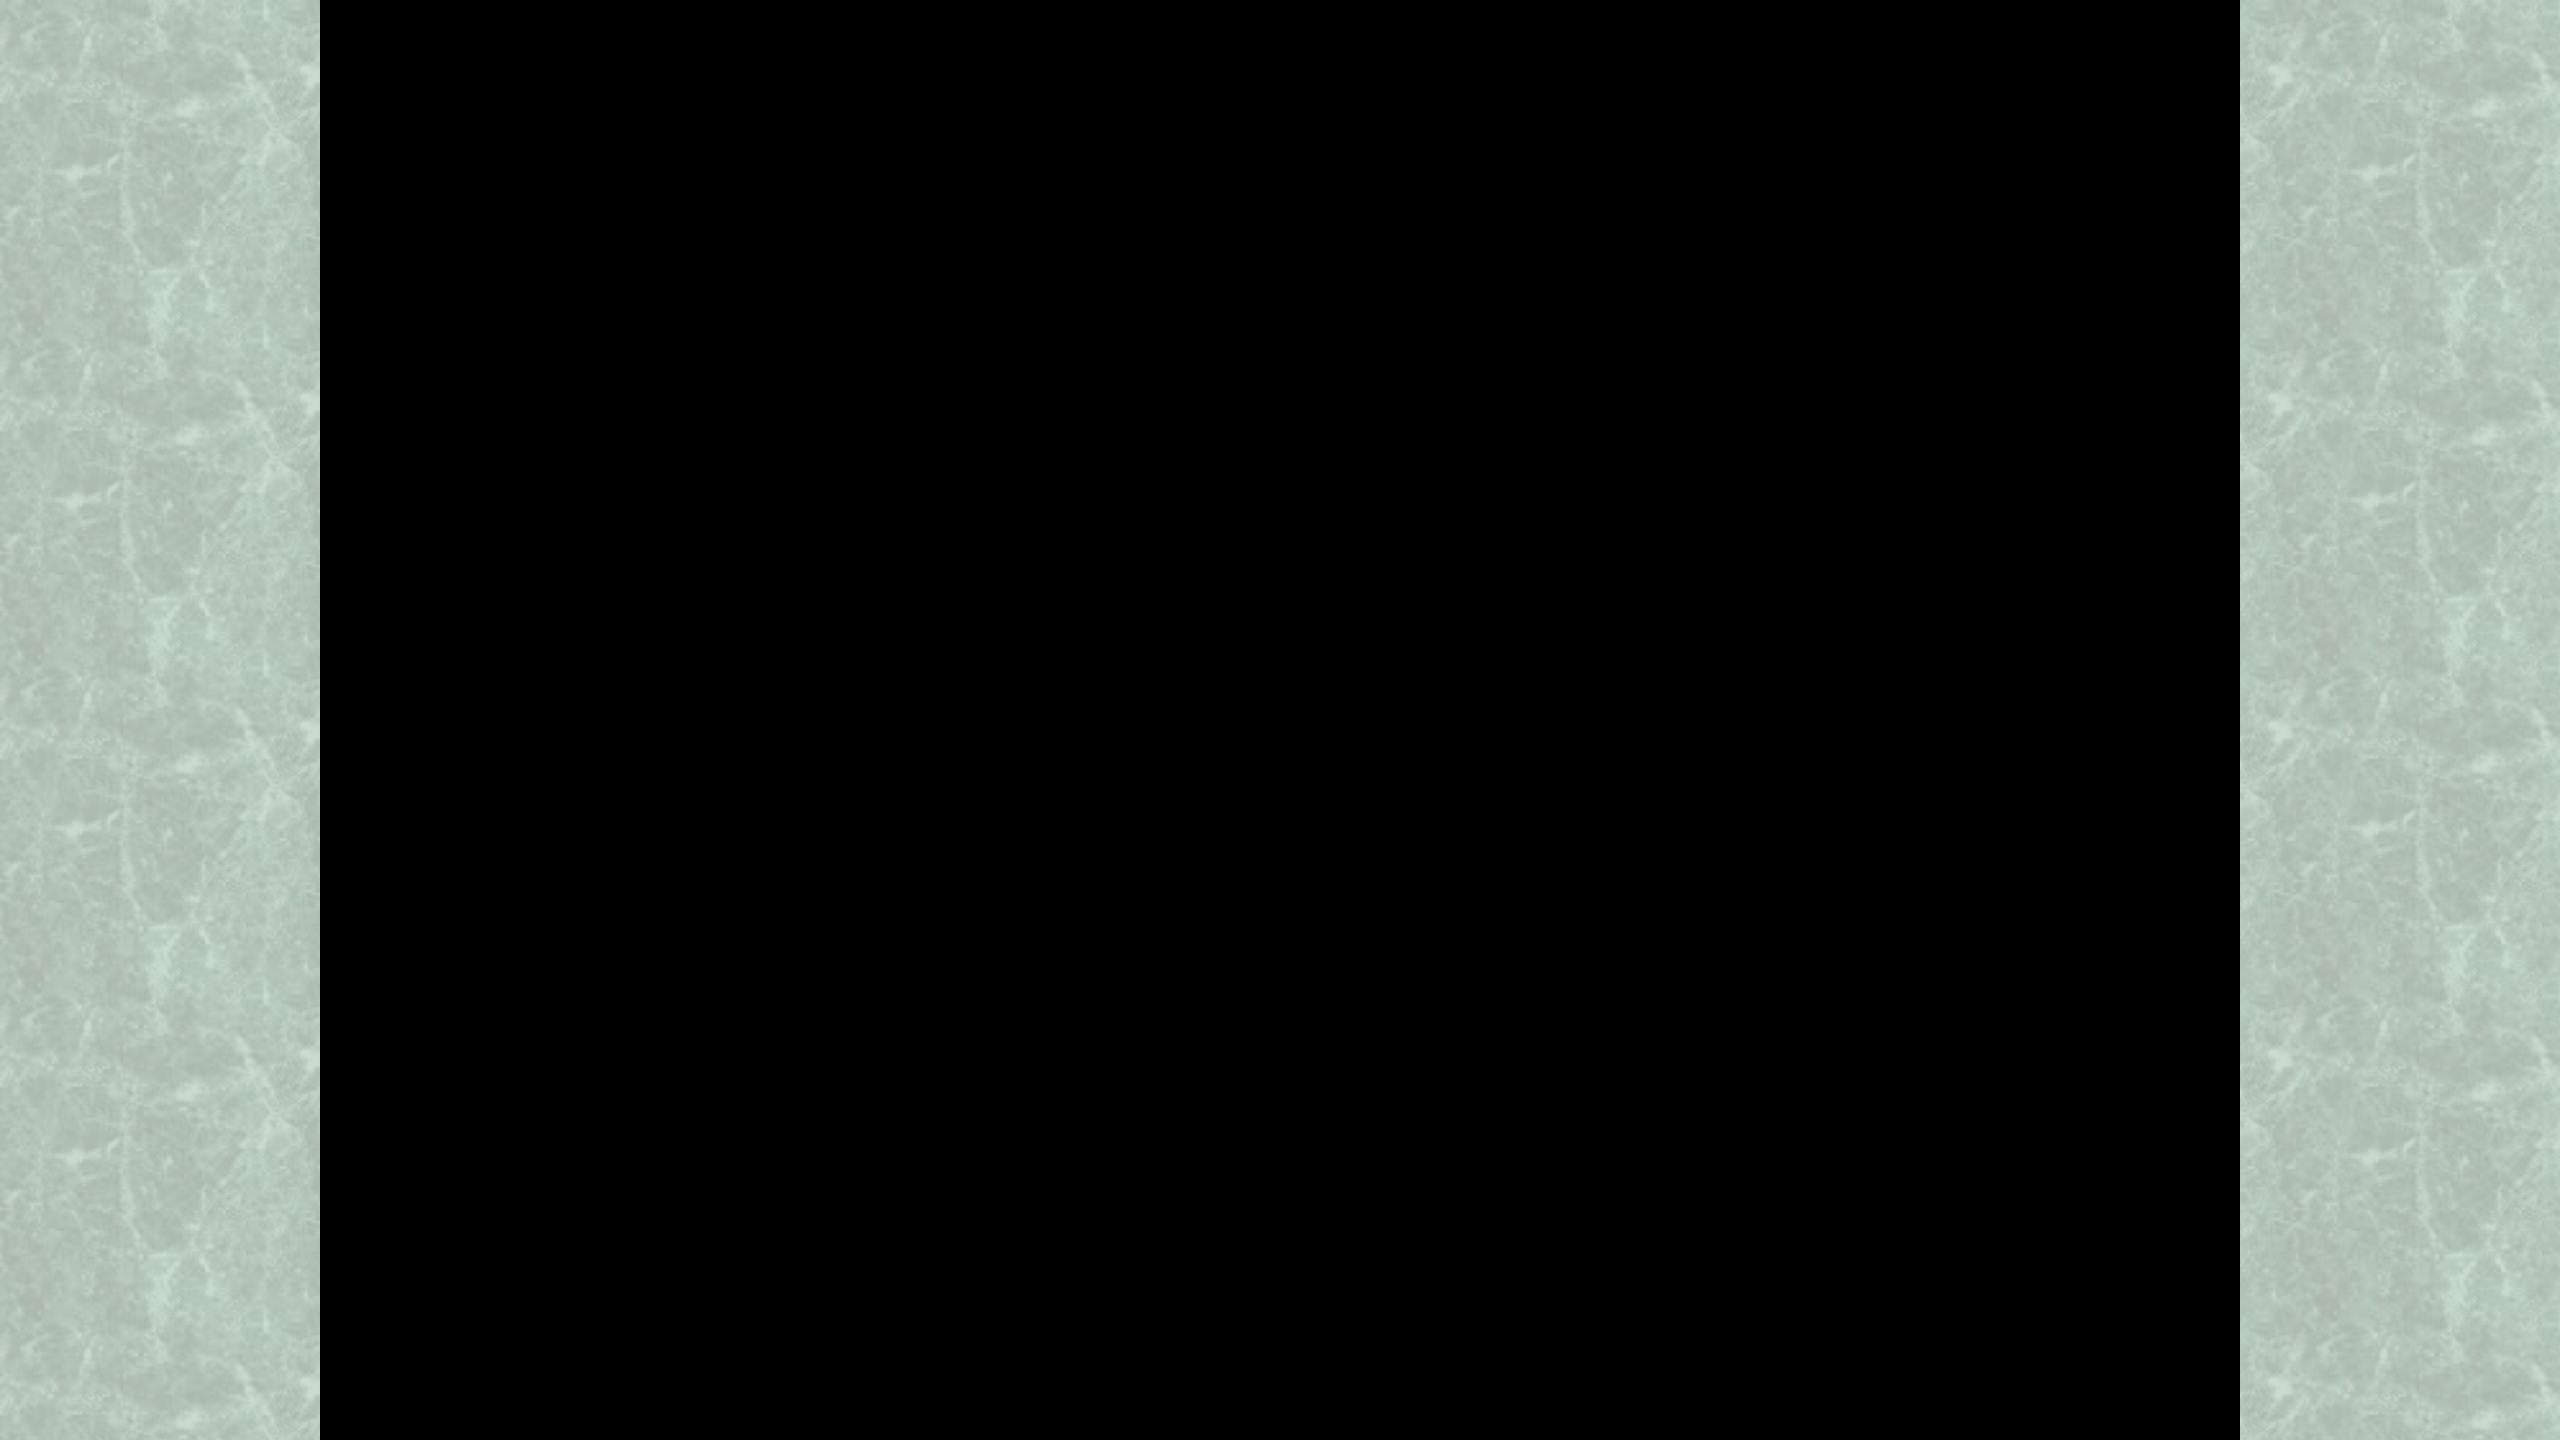

In Business

Inventory control
Material costs
Equipment costs
Bulk vs. Single Purchasing
Customer service
Profit margin
Packing
Shipping costs

Silk Screening

Logo Design
Create the screen for printing
Printing
Curing ink
Water-Based vs. Plastisol ink

Service Learning

Raffle Bike

Students restored a vintage mini bike and raffled it off to raise money for a teacher in the district who had been diagnosed with breast cancer.

**Students raised a Grand Total
of \$5,459.00**

Community

Student's are restoring a 1967 Sears Runabout for a 1970 West Branch Graduate.

The bike was his when he was a teenager. The bike caught on fire and spent the last 40 years in a shed behind his house.

Partnerships

Advantage Auto Parts – Warren, Ohio

Furry's Motor Sales and Service – Alliance, Ohio

Black Widow Motorsports – Oak Grove, MN

OMB Warehouse – Levittown, Pa

Melanie Moto – Torrance, Ca

Cerakote Powder Coating – Warren, Ohio

Mudd-Ox – Shipshewana, In

Knowledge Bowl

Academic competition that allows CBI students to compete against each other in both a regional and a state competition.

It encourages teamwork.

It demonstrates that learning can be fun.

It develops student pride, confidence, and study habits.

It is good for resumes and future employment.

Many of the questions focus on content from End of Course Exams, ACT, GED, Work Keys, various credential assessments, CBI classroom and work-related topics financial literacy, and random, fun trivia.

Knowledge Bowl Teams are separated into three divisions based on grade level.

Middle School Division: Grades 7-8

Junior Division: Grades 9-10

Senior Divisions: Grades 11-12

Scholarships and Awards

Scholarships

Jeff Akers Scholarship - Grades 7-9

Thomas Hyde Scholarship - Grades 10-12

CAREER BASED INTERVENTION PROGRAM

Home Calendar Spring Conference Knowledge Bowl Awards The Chronicle Resources Region

WHY CHOOSE CAREER BASED INTERVENTION?

The Career-Based Intervention (CBI) program is a Career-Technical Education Program designed to help students improve academic competence, graduate from high school, develop employability skills, implement a career plan and participate in a career pathway in preparation for post secondary education and/or careers.

The CBI program provides opportunities for student success!

The CBI program provides a combination of educational and work-based learning opportunities for student success. The number of years a student spends in the CBI program is determined by the local program design and individual student needs. CBI programs are recommended to have a minimum of 15 and a maximum of 25 students per class and all CBI students must have scheduled related instruction. CBI program models can be single period which is referred to as Connections (or Career Connections) or programs may be multi period in which students have separately scheduled related instruction and work-based learning periods. Academic instruction (for credits) by the CBI instructor is not a program requirement but is recommended if the instructor is age and subject appropriately certified/licensed. All programs must provide academic intervention to assist the student with study skills, assist with academic progress and success and prepare for appropriate standardized testing.

Key Principals

The following key principals are based on seven of 10 High Schools That Work research-based key practices linked to student achievement and the integration of academic and career-technical skills and are intended to guide CBI program design and delivery to best meet student needs.
