

JANET GABRIEL JARZYNA

HANDCRAFTED NECKLACE SETS

PIERRAGE

ARTIST'S STATEMENT

I've always been fascinated with color, stones, exotic places and history. My travels and work experiences to Asia, Africa and Europe have opened my eyes and heart to all of these. I celebrate my fascination by combining all of these interests in the creation of necklace sets with materials from around the world.

My goal is to break away from ordinary compositions and create unlikely combinations from a variety of cultures past and present. Stones carry energy, color excites the senses, exotic sights captivates the curiosity and historical content gives balance.

I believe jewelry is an extension of a woman's personality. Neck adornments are worn to beautify, to comfort, and for gaining attention. Discerning women wear jewelry that accentuates their "best look" and gives a good feeling inside. Discerning women also look for practicality and uniqueness. Discerning women love to buy that special piece that not everyone is wearing and well affordable. This is what I create. Other websites: www.janetsGemArt.com
