## INVASIVE GARLIC MUSTARD from the Stewardship Team's *Creation Care Ministry*

You have probably noticed the small to medium size green plants that have small white flowers and seem to be everywhere. They are garlic mustard plants that are invasive and spread rapidly. The reason they are so harmful is they affect the composition of our soil which in turn inhibits the growth of our native plants.

### How to get rid of them

The most effective way and the least harmful to the environment is to hand pick them. Do not shake the dirt off because this distributes the seeds. **Do not place them on the ground!** Place them in a garbage bag and put them in your garbage. These plants are biennials so you may think you have gotten rid of them for the next year but they reappear the year after. You have to be serious about removing as many of them as you can.

### Core Purpose

*All Saints Episcopal Church exists to receive and share the power of God's love to transform lives through Jesus Christ.*

### Vision Statement

*"We are All Saints Church, bringing the transforming power of God's love to all."*

*We are committed to transcend differences and unite as one in Christ. Our Spirit-filled worship calls us out of our historic sanctuary and into our communities to act faithfully bringing love, joy and peace to all. We are called to think, to believe, and to imagine.*

### 2019 Mission

*"Making a Difference"*
