

January 17, 2022 – COVID update

Greetings from Midway Nursing Home

As you know, we have been closely monitoring our residents for any signs/symptoms of COVID and per NYSDOH & CDC guidelines, have conducted ongoing testing.

There is one new resident COVID positive case. There are 14 residents who have tested positive and remain on isolation. This includes residents who were admitted with a COVID positive test.

Some staff members remain on quarantine. All staff and residents will continue to be tested at least weekly until there are no new cases found for either staff or residents.

Per NYS Dept of Health guidance, visitors will be required to present proof of a negative rapid COVID test that was completed within the 24 hours prior to the visit or a PCR result from a test that was conducted within 48 hours prior to the visit. If this hasn't been done, we will test you prior to the visit & show you how to do this yourself with the provided test kit.

You will be required to wear a surgical mask which will be provided at the facility. No cloth masks will be allowed unless worn over the provided mask.

If you feel ill in any way, please do not visit in person but arrange a virtual visit or phone call. For virtual visits please contact the Recreation Department.

We continue to closely monitor our residents per current CDC & DOH guidelines and screen all employees and visitors upon arrival. If you or your loved one has not yet been vaccinated or received a booster, we strongly urge you to do it now.

During visitation, you must sanitize your hands and wear a mask which we will provide to you. The mask must cover both your nose & mouth and be worn while on facility premises. There are no exceptions. You will be instructed by staff as to other precautions necessary to keep your loved one and you, safe.

Thank you.
