

Calling Beekeepers!

We are still in need of beekeepers to volunteer to participate in the National honey bee pest survey. Volunteer Beekeepers will receive information on what was found (or not) in their hives. This will be the first year Kansas has participated.

Qualifications:

- Need 10 hives in a bee yard
- Allow us to combine one frame of bees from each of 8 hives and sample (take) approximately 2 ¼ cups bees to send to USDA and University of Delaware for testing.
- If you raise queens and want to volunteer, we need to know that (they would prefer 10 queen breeders, I have one so far). Not required only if we can find them.
- Needs to be completed by July 20th, 2017.

Please let Sharon Dobesh (sdobesh@ksu.edu or 785-313-3983) know as soon as possible if you are interested!!
