

## Summary

I enjoy every step of the problem-solving process, from design and theoretical analysis of new algorithms to implementation in large-scale systems. For my PhD research I developed scalable approaches for computing game-theoretic solution concepts and learning in imperfect-information games. I have applied several of these techniques to the domain of poker: 2-player no-limit Texas hold 'em agent Tartanian7 that I created won the Computer Poker Competition, and Claudico competed against top human specialists in the Brains vs. Artificial Intelligence competition. I also developed approaches for games with more than two players, robustly exploiting suboptimal opponents, and computing strategies that are human understandable.

**Interests:** artificial intelligence, game theory, multiagent systems, multiagent learning, large-scale optimization, large-scale data analysis and analytics, knowledge representation.

## Education

- Ph.D., Computer Science, Carnegie Mellon University, 2015
  - Thesis: “Computing Strong Game-Theoretic Strategies and Exploiting Suboptimal Opponents in Large Games”
- M.S., Computer Science, Carnegie Mellon University, 2009
- A.B., Mathematics, Harvard University, 2005
  - Concentration GPA: 3.9; President of club tennis team for 3 years; Co-founder of bridge club

## Awards

- Best Paper Award, “Computing Equilibria in Multiplayer DAG-Structured Stochastic Games with Persistent Imperfect Information” at *Conference on Decision and Game Theory for Security (GameSec)*.
- Paper “Reflections on the First Man vs. Machine No-Limit Texas Hold 'em Competition” selected to be feature article in SIGecom Exchange Newsletter for ACM Interest Group on Electronic Commerce.
- First place, Annual Computer Poker competition, two-player no-limit Texas hold 'em bankroll instant run-off and total bankroll divisions, at the *AAAI Conference on Artificial Intelligence (AAAI)*, 2014 (with Noam Brown and Tuomas Sandholm). Our agent beat each opponent with statistical significance.
- Paper “Safe Opponent Exploitation” from *ACM Conference on Electronic Commerce* invited to “Best of EC” special issue of journal *ACM Transactions on Economics and Computation* (with Tuomas Sandholm).
- Finalist, Best Student Paper Award, “Computing an Approximate Jam/Fold Equilibrium for 3-Player No-Limit Texas Hold'em Tournaments” at *International Conference on Autonomous Agents and Multiagent Systems* (with Tuomas Sandholm).
- United States Presidential Scholar.
- National Merit Scholar.

## Employment

- Founder, Ganzfried Research, 2015–present
  - Conducting research and building technology in artificial intelligence and game theory with applications including poker, education, medicine, socialization, and hurricane prediction.
- Independent consultant and principal investigator on contract for DARPA grant, 2018–2020
  - “Serial Interactions in Imperfect Information Games Applied to Complex Military Decision Making.”
- Assistant Professor, Florida International University, Computer Science, 2016–2018, Miami, FL
  - Director, Strategic Adversarial Multiagent Artificial Intelligence Laboratory, [www.sam-ai.com](http://www.sam-ai.com).
- Quantitative Trader, Tower Research Capital LLC, 2005–2006, New York, NY
  - Designed, implemented, and deployed high-frequency trading algorithms.
- Director’s Summer Program, National Security Agency, Summer 2005
- Research Experiences for Undergraduates, Mathematics, Oregon State University, Summer 2004

## Media

- “Meet the FIU professor who created program that can beat the poker pros,” Miami Herald, front page of “Tropical Life” section, March 14, 2017.
- “Turing and the Poker Endgame,” PokerNews online article, August 30, 2016.
- “Poker-playing AI ‘bot’ carries long-range impact,” Pittsburgh Tribune-Review, August 26, 2016.
- Played in high-stakes poker game for the television series “Poker Night in America,” November 2015.
  - Season 4 episodes 17 and 18, aired in October 2016 on CBS Sports Network.
  - Commentated for and played on the show again 11/19–20/16 and commentated on 3/11/17.

## Other presentations

- “Successful Nash Equilibrium Agent for a 3-Player Imperfect-Information Game”
  - Princeton University, 5/1/18, organized by Princeton Poker Club.
  - MIT, 5/3/18, organized by MIT Poker Club.
- “Optimal Number of Choices in Rating Contexts” 4/20/2018, FIU Department of Mathematics and Statistics Annual Mini-Conference in Statistical Methods and Mentoring.
- “Artificial Intelligence: From Poker Agents to Hurricane Prediction” 9/30/2017, FIU ShellHacks hackathon.
- “Strong Game-Theoretic Strategies: Beyond Two Agents” 9/15/2017, MIT, organized by MIT Poker Club.
- Three-part guest lecture on computer poker at Tsinghua University game theory class, 5/8/17.
- “Endgame Solving: The Surprising Breakthrough that Enabled Superhuman Two-Player No-Limit Texas Hold ’em Play”
  - Princeton University, 3/13/17, organized by Princeton Poker Club.
  - Tsinghua University, 5/7/17.
  - Microsoft Research Asia Lab, 5/11/17.
- “First Man vs. Machine No-Limit Texas Hold ’em Competition” 2/1/17, Stanford University.
- “Computing Strong Game-Theoretic Strategies in Large Games” 3/24/16, Princeton University Poker Club.
- “Reflections on the First Man vs. Machine No-Limit Texas Hold ’em Competition” 3/18/16, Susquehanna International Group.

## Professional service

- Guest editor: *Mathematics* journal special issue on “Game Theory and Artificial Intelligence” (2022).
- Organizer: Tutorial on Computer Poker at Conference on Economics and Computation (2016) and AAAI (2017).
- Organizer: AAAI Workshop on Computer Poker and Imperfect Information (2014, 2015).
- Program committees: AAAI (2012, 2014–2018), AAMAS (2014, 2016, 2021), IJCAI (2013, 2015, 2016, 2022, 2023), WWW (2018, 2019), NeurIPS (2021).

## Teaching

- Instructor, Game Theory, new graduate course at FIU (2017), [www.bestgametheoryclass.com](http://www.bestgametheoryclass.com).
- Instructor, Artificial Intelligence, new undergraduate course at FIU (2017), [www.ultimateaiclass.com](http://www.ultimateaiclass.com).

## Mentoring

- Farzana Yusuf, PhD student at FIU. Areas: artificial intelligence, machine learning.
- Sheila Alemany, Undergraduate CS student at FIU. Areas: artificial intelligence, machine learning.
  - Finalist for CRA Outstanding Undergraduate Research Award.
- Max Chiswick, MSc in electrical engineering from Technion. Areas: artificial intelligence, machine learning.
- Worked with Princeton undergraduate student Bradley Snider on his thesis in mathematics (2017).
- Worked with Stanford mathematics PhD student Qingyun Sun on opponent exploitation algorithms.
- Worked with Harbin Institute of Technology MS student Kailiang Hu on game-theoretic algorithms.
