

SHOCK DESIGNATION

<p>14, 16 - Piston Rod Diameter in Millimetres</p>	<p>M - Monotube</p>	<p>E - Emulsion Type</p>
<p>35, 40, 46 - Piston Diameter in Millimetres</p>	<p>GS - Gas separator piston in main body of the shock</p>	
<p>PB - Piggyback type with gas reservoir 'piggybacked' to main body of the shock.</p>		
<p>PBA - Pistol type with gas reservoir 'piggybacked' to main body of the shock in a pistol fashion.</p>		
<p>PBB - Inline type with gas reservoir 'piggybacked' inline with the main body.</p>		
<p>H - Remote gas reservoir attached to main body of the shock by flexible hose.</p>		
<p>D1 - Combined rebound and compression adjustment. Adjuster wheel on end-eye.</p>		

SHOCK DESIGNATION

D2 - Rebound damping adjustment. Adjuster wheel on end-eye. Independent compression adjustment. Adjuster on the reservoir.

D3 - Rebound damping adjustment. Adjuster wheel on end-eye. Independent high and low speed compression damping adjustment. Adjuster on the reservoir.

L - Adjustable shock length for ride height adjustment. Available with a clevis or a bearing end eye depending on model.

HP1 - Hose mounted hydraulic spring preload adjuster. Hydraulic preload adjusters (HPA's) are available for both 40mm or 46mm shocks, the HPA allows for simple and immediate adjustment of reload without the need for any tools. This system eliminates the time and effort usually associated with dynamic changes in the motorcycle's attitude when adapting to ride with a pillion or luggage. Featuring 50 clicks of fine adjustment.

HP2 - Integrated hydraulic spring preload adjuster.

Example Nitron Code:

M-16/46-PBA-GS-D1-L-HP1

SHOCK DESIGNATION

Monotube, 16mm piston rod, 46mm piston, pistol type 'piggyback', gas separator, independent high and low speed compression damping, Adjustable shock length for ride height adjustment, Hose mounted hydraulic spring preload adjuster.

Optional Titanium Black Springs

TWIN SHOCK APPLICATIONS

Style Options

Having the right look for a bike with twin shocks can sometimes be as important as the performance upgrade so please choose from 3 distinct style options to match your bike. Our Classic (Titanium/ Black), Stealth (Stealth/ Black) & NTR (Titanium/ Blue) styles are all built using the same high grade hard-anodised parts and polished chrome piston rods, but with more refined colour choices to suit any bike.

DUCATI

FORK CARTRIDGE APPLICATIONS

Fork Designation

NTR TVT

NTR TVT Pro

NTR TRI-VALVE TECHNOLOGY FORK CARTRIDGE KITS

All NTR TVT Cartridge Kits feature large bore 25mm pistons which provide significant improvements in performance over the OEM set up and ensure consistency during prolonged periods of use.

All vital components are hard anodised with the option to upgrade to 'Pro' specification which includes ultra-low friction Kashima coating if desired. Developed and tested in conjunction with some of the world's leading race teams, independent adjustment control of rebound and compression damping is both easy to use and extremely effective.

The damping control system consists of an adjustable compression cartridge for installation into the left fork leg and an adjustable rebound cartridge for the right fork leg. Both offer independent damping and pre-load adjustment via the uniquely styled fork top caps. In addition to this, what really sets the TVT Fork Cartridge Kits head and shoulders above other fork upgrades is the fully integral Tri-Valve Technology system. By incorporating the TVT high speed damping valve into the compression cartridge, Nitron have been able to achieve an ultimate balance of performance, stability and compliance which give unrivalled levels of rider confidence and control.

All three valve pistons can be quickly and easily removed for re-valving without the need to remove the forks from the bike, keeping workshop time to a minimum and meaning trackside changes and set-up can be done with ease.

Fitting the new range of TVT Cartridges Kits does require some special tools and these are available individually or as a kit directly from Nitron.

BMW

BMW S 1000 R (15-16)
