# THE SMART BOWL SYSTEM

PATENT PENDING

- NSF Approved In 23 Vibrant Colors
- Smooth Sandstone High-Gloss, Porcelain-Look Finish
- Coated in the USA by Bon Chef
- Raw Materials Made in the USA
- Will Not Stain
- Does Not Absorb Food Flavors or Odors
- Chills Quickly & Stays Colder Longer
- Clean & Sleek Presentation
- 3 Year Chip Proof GUARANTEE
- LIFETIME Peel Proof GUARANTEE
- Maintains NSF Salad Bar Temperature Standards
- Designed To Fit NSF-7, Non-NSF-7, & Custom wells
- Smart Bowls are stackable and available in depths of 1.5-, 3-, and 6-inch, in variety of sizes ranging from 1/8 to full.

**No Measurements Needed** with Make & Model Numbers

**Minimal Measurements Needed** for Custom Wells

# THE SMART BOWL SYSTEM

PATENT PENDING

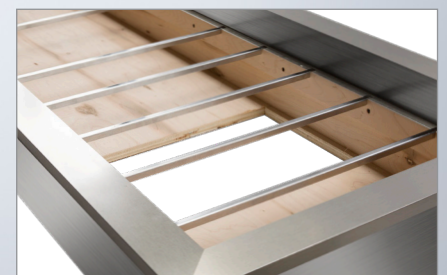

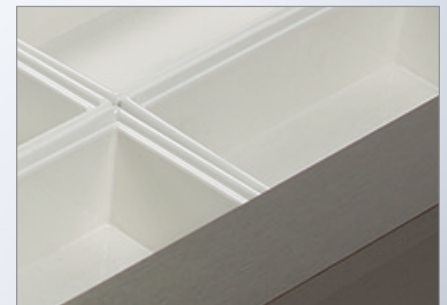

**The Bon Chef Smart Bowl System** was specifically designed to fit all NSF-7 & Non NSF-7 Mechanical cold well manufacturers including standard & custom wells using our specialized support bars without the use of an under-shelf.

No measurements are needed with Manufacturer make & model numbers. Just provide the Make & Model of your cold well and we will do the rest including creating a customized layout specific to your individual well.

Layouts ship with every single smart bowl order so operators can easily set up right out of the box.

In order to maintain a NSF food temperature of 41°F, the Smart Bowls should be used in an NSF- 7 Mechanical Cold Wells. Smart Bowls must be pre-chilled in refrigerator for a minimum of two (2) hours and then filled with pre-chilled food (38°F or colder) just prior to set up.

Smart Bowls can be used with Non NSF-7 Wells and many times the proper temperature can be achieved, however, Bon Chef makes no claim on maintaining food temperatures for Non NSF-7 wells.
