

S.t.e.A.M. Plane

S.T.E.A.M stands for Science, Technology, Engineering, Art and Math and all of those go into this DIY plane!

Materials Included:

- Rubber band
- Clear nose piece
- Propeller
- Plane Body
- Wings & Tail pieces

Things You Need From Home

- Crayons, markers, stickers and more to decorate!

Instructions

1. There is no right or wrong way to put your plane together (but we suggest that you decorate it first.)
2. After it's all decorated, try assembling the plane different ways and see what flies the best. Add more wings and see what happens. Add more weight to the nose - does it fly farther?
3. Hint - try looping a rubber band around the notch on the bottom to launch your plane a little farther!

To be entered in our monthly art kit drawing please share a photo or video with Dancing Spirit at <https://www.facebook.com/dancingspiritgallery/>
