

Rapid Deployable Decontamination

In just minutes with minimal personnel, the Disaster Medical Technologies Pneumatic Decontamination System fuses state-of-the-art inflatable shelter technology with a superior combination of capabilities to form a portable, all weather solution for the environmentally safe decontamination and shower shelters. The shelters are a temporary shower area. The Disaster Medical Technologies Portable Decontamination System provides the area and can be used for decontamination, hazmat, firefighters, hospitals, special needs, and communities.
