

Senior Planner - Calgary

Scheffer Andrew Ltd. is an Alberta based engineering and planning consulting firm with offices in Edmonton, Calgary, Medicine Hat, and Cold Lake. We serve the private and public sectors in the planning of residential, commercial, and industrial developments, and provide planning advisory and application processing services to Alberta municipalities.

We are looking for an outgoing and experienced land use planner who is active in the community and has at least ten years of planning experience. An urban planning degree (or similar) and full membership with the Canadian Institute of Planners will be viewed favourably.

- Applicants should demonstrate experience in regulatory land use planning, land use policy and urban design. Experience working within Alberta's planning system and prior consulting experience in the Calgary region is essential.
- The job includes a mixture of land development processes (Land Use re-designations, Area Structure Plans, Outline Plans, Subdivisions), a variety of public sector planning projects, and collaboration with our engineering team. Business development and promotional work are an important part of the role.
- As part of a small team, applicants should be self-motivated and able to provide leadership and guidance to other team members, but also able to work independently as a self-starter. Opportunities for growth in your role within the company are limited only by your ambition.

We offer an attractive benefits package and flexible working arrangements in an easy going and collegial environment, competitive salaries with bonuses based on individual performance and corporate success, support for professional development, and opportunities for participation in ownership.

If you are interested in this opportunity, please email your resume in confidence to v.klyashitsky@schefferandrew.com. We thank those who express an interest, but only those candidates who best match our requirements will be contacted.
