HE&W Analytics | *"The Testing and Measurement Experts"*

analytics.heandw.com

Company Overview

HE&W Analytics is an environmental testing and measurement specialist company delivering industry-leading products and solutions to clientele across the Caribbean. Whatever your sector, whatever your challenge, we have just what it takes to meet your data collection, quality assurance, health and safety compliance, and environmental protection needs.

Products

Our suite of products test and measure a range of environmental parameters in many diverse settings and environments. Whether you're monitoring sea-level rise, fume hood velocity, landfill leachate, or construction dust dispersion, we have the right equipment and instrumentation to meet your needs.

Solutions

Whether your goal is improved quality, greater competitiveness, or better environmental or health and safety compliance, we have just the right fit to add value to the work you do. Contact us to discuss our solutions and learn how we can customize them to meet your specific needs.

Sectors We Serve

We meet the needs of clients across the region in 9 major sector groupings. Get in touch to find out about the products we offer in your industry or field.
