The Radio Guys Newsletter

In This Issue:

- Thank You!
- Introducing Our Leader
- Current Affairs
- Did you know?

We Appreciate You!

Over the years the two way radio business has gone through so many changes from Analog to Nextel and now to Digital. These changes have evolved our business model and yours! Our goal is to provide you with a tool to keep your communications efficient and productive. We truly appreciate your trust and loyalty throughout the years. We wouldn't be here without you!

Dave Matthews

OMG does he sing?? Yes, but not professionally. Did you know Dave was in the United States Navy? It was in the Navy he received training as an Electronics Technician, and then worked for Motorola Inc. Dave opened The Radio Guys in 1999, April 2019 will mark 20 years in business!

"I was promoted into a position where I have been directly working with The Radio Guys for the past 3 years. As I have been learning the laws and programs required, they have helped me immensely! Their knowledge and professionalism has been refreshing to say the least! Trust in a vendor to me, is paramount, and I can say I certainly trust The Radio Guys!!"

Current Affairs

- Wildfires strike again! The Radio Guys were approached with an opportunity to help the Chico Boys and Girls Club with a donation of two way radios for staff while the Paradise location was displaced. If we can help, we will!
- We recently deployed a school district-wide digital two way radio system in the East Bay, ensuring staff has the appropriate tools to handle an emergency situation.
- We're growing!! In an effort to better serve our customers in a timely manner, we've hired additional administrative and service staff. Come by the office and say hi, we'd love to see you!

Fleet Charging Solutions

- Six or twelve? Charge your entire fleet of radios on one charging unit.
- Different model radios? No problem. The charging pods can be changed to accommodate most popular radio models.
- Configurable mounting and power options for vehicular or desktop use.
