

anti age prescription

Image Skincare is an internationally operated professional skincare company that is available in 27 countries worldwide. Our FDA-certified laboratory utilises the most scientifically advanced formulas in today's marketplace to create pharmaceutical grade skincare products that give licensed physicians and therapists the ability to offer professional treatments and products that yield unparalleled results.

Everyone wants to age later, reduce wrinkles, achieve a toned complexion and maintain a healthy youthful complexion. One ingredient which we know does all of the above is Retinol. Generally used in conjunction with vitamin C, this skin saving ingredient boosts collagen, brightens, plumps and resurfaces all ageing skin.

Image Total Retinol A crème contains peptides, shea butter, hyaluronic acid and no parabens. This super active treatment product needs to be introduced slowly to your skincare routine. We recommend starting with once weekly at night. If your Image Skincare skin therapist recommends it, this can gradually be built up. The maximum usage of this treatment product is three times weekly.

Retinol A cream increases cell turnover and clears build up of dead skin. It is normal when the process is taking place for your skin to feel tight and you may notice some skin shedding. These side effects can last up to one month.
