

# Compliance Solutions to Cover Your Entire Fueling Facility

When it comes to fueling facility environmental compliance, no company in the US comes close to **Tanknology** in experience and full-range of capabilities.

**UST Inspection Services, Inc** is Massachusetts' leader in Third-Party Inspections for fuel systems operators, specializing in the complexities of permitting, environmental investigation and remediation services..

Together, our two companies provide all the experience and capabilities necessary to help you efficiently and cost-effectively manage the multi-faceted regulatory requirements for your fueling facilities.

Whatever your tank site need – compliance testing, tank monitoring installations, corrosion protection, tank inspection, fuel filtration, remediation services, compliance management, operator training, or virtually anything else associated with a tank facility – we have an unmatched combination of services to assist you.

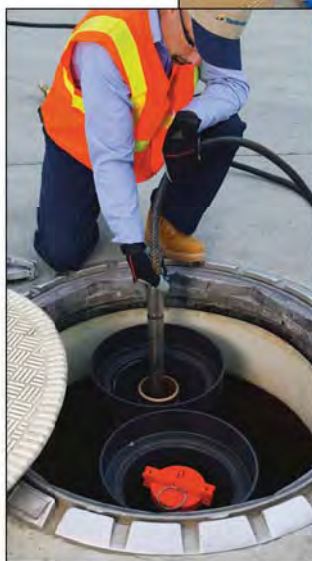

Our associates have at their disposal the broadest array of compliance-related services, with the most innovative line of proprietary technologies in the world. That is a mix of expertise and capability that no other partnership can match. When you partner with us, that's the team you have on your side.

Tanknology holds 22 patents on UST leak detection equipment and monitoring technologies and its field technicians undergo rigorous training and certification on all of its testing systems. You can have confidence that you have the most qualified technicians at work on your behalf.

**Whether you desire a turn-key compliance solution for your site or help with a single environmental issue, call UST Inspection Services Inc. at (781) 383-8783 or visit [www.USTinspection.com](http://www.USTinspection.com).**
