

TTech X-80 Iris Camera System

Quick Deployment, Low Cost, Large Area Video Alert Systems

The X-80 Iris Camera System provides unmatched day and night wireless camera awareness. If you manage a large ranch, equestrian center, construction yard or high value agricultural facility, you can now sleep at night.

The Tremor Tech X-80 Iris Camera System has proven experience on the U.S. Border and is now available to detect activity at your agricultural or construction facility.

Battery operated cameras transmit high quality (up to 5 megapixel) images to your base of operations and on to you as an email attachment, 24 hours a day.

Free Site Survey And Equipment Quote Available

Up to 254 cameras can be added to your network providing full coverage of all areas of your operation. With blackout illumination, subjects will not be alerted of system activation or image transmission. Cameras and sensors can transmit up to two miles independently or work together to form much larger Mesh networks. Two-way camera communication allows you to trigger cameras remotely for an instant view of all the action.

Full service, installation and maintenance are available so that you can focus on your primary objectives. Feel free to call us anytime, so that we can consult with you at no charge concerning your system needs.

Brent Davison: Tremor Tech, Owner & Founder has over 33 years experience in Law Enforcement and International Border Security. Allow me to put my experience to work for you. It would be my pleasure to consult with you on your remote intrusion detection needs!
