

August 2021

The Beachcomber

By: Mike Brown

Hernando Beach Property Owners Association Newsletter

Our next meeting
will be held
**Thursday,
August 5, 2021, at
7:00pm at the HB
Marine Group
Training Facility,
4340 Calienta St.,
doors open at
6:45pm.**

~~~~~

**The purpose of  
this organization  
is to unite the  
property owners  
of Hernando  
Beach for Civic  
purposes that  
lead to improved  
quality of life.**

### **PRESIDENT'S MESSAGE BY DAVID C. SKINNER**

Welcome to all existing members and new members to the HBPOA. My message for July and August will attempt to bring you up to date on significant activities that occurred during July and a look at what will be happening for August. As you know, we did not have a regular HBPOA meeting in July due to most members enjoying summer vacations with family. July brought our first Hurricane to the Hernando Beach area and fortunately the weather did not amount to much more than a tropical storm with significant rainfall. Tides were expected to rise about 3 to 4 feet above flood stage, however we can be happy that this did not happen. Just for the record, Hernando Beach enjoyed the best fireworks displays I have ever seen in any community. Everyone was all-out to show their Patriotism.

This month our Landscape Committee Chairman and Director Bill Roberts spent unknown hours working on the repairs to the Hernando Beach Triangle on the corner of Osowaw and Shoal Line Blvd. after several accidents destroyed the existing new Crape Myrtles and wind damage broke the flagpole. Bill has informed me that all the repairs have been completed and the Crape Myrtles are Blooming. The flagpole has been welded and repaired and "OLD GLORY is FLYING again. We also want to thank the members that recently donated funds to help make these repairs possible.

July also brought Back-to-Back Stanley Cup Championships for the Tampa Bay "Lightning". Congratulations go to the "BOLTS" for such a significant accomplishment.

August brings us back to our normal HBPOA activities. Our August guest speaker will be Mr. John Burnett who is an Engineer for the Hernando County Engineering dept. as a Certified Floodplain Manager and a Florida Fish and Wildlife Conservation Commission Gopher Tortoise Agent. We look forward to having John speak with us on such an important subject that affects all our residents.

Our new Board of Directors have been working together to support our community in many ways. During the past few months, we have accomplished many new projects to help improve not only our community environment but also help streamline our internal organizational communications that help coordinate the activities of our

(Continued from page 1)

various Committees such as the Hospitality Community, Membership Committee, Government Affairs Committee, Landscape Committee and The Beachcomber. We are still in the development stage but already have set up individual Group Communication site for the Hospitality Committee (Judy Hughes - Chairman) and will soon add a special Group contact site for the HBPOA Membership Committee (Patti Roberts - Chairman). We feel the group sites will enable the chairman to coordinate their activities and communications to HBPOA members in a timelier fashion.

To all our HBPOA members - I am still "Learning the ropes" but be assured that our association is working together as a team to support your community. Our Volunteer Board Members have dedicated a considerable amount of time to maintain and improve our community.

I would also like to remind members that we still have 3 positions on our board that need to be filled. If you are interested in sharing your talents to help keep Hernando Beach the Community of Choice and a great place to live. Please contact me at [www.hernandobeachpoa.com](http://www.hernandobeachpoa.com).

DAVID C. SKINNER  
President, HBPOA

### AUGUST SPEAKER JOHN A.H. BURNETT HERNANDO COUNTY PUBLIC WORKS STORMWATER SECTION

John was educated in Aberdeen, Scotland and worked in Glasgow as a property surveyor. He was commissioned into the British Army after attending the Royal Military Academy, Sandhurst, and served with the 1st Battalion of the Gordon Highlanders in Northern Ireland, Cyprus, Belize and in the United Kingdom as an Infantry Platoon Commander and Windsurfing Instructor. In 1984 he became resident in the United States and attended Central New England College, studying Engineering, and worked for Moore Survey and Mapping Inc. (Survey Crew, Drafting Technician) and E. J. Flynn Engineers (Engineering Designer, Soil Technician) in New England. He moved to Florida in 1989 with his family and attended University of South Florida, studying Geography. He worked for Henigar & Ray Engineering Inc. (Engineering Designer) in Crystal River and joined Hernando County's Engineering department in 1992, where he worked as a construction inspector, water resource coordinator and drainage inspector. He is a Certified Floodplain Manager and a Florida Fish and Wildlife Conservation Commission Gopher Tortoise Agent.

John is married and has two adult children and five grandchildren.

### 7 Seconds Rule

Press back of your hand against the asphalt for 7 seconds. If it's too hot for your hand, it's too hot for your dog's paws.

Air  
Temp.

Asphalt  
Temp.

### On Hot Days:

77°F

~ 125°F

86°F

~ 135°F

87°F

~ 143°F

1. Keep Dogs Off Pavement and Asphalt
2. Use Paw Protection: Booties, Paw Wax
3. Check Paws Daily for Signs of Damage
4. Be Mindful of the 7 Seconds Rule
5. Walk During Coolest Hours of Day

Temperature correlations represent worst-case variables: direct sun, no wind, very low humidity, and high radiant energy.

## FLORIDA GOPHER TORTOISE

(*Gopherus polyphemus*)

Gopher tortoises are dry-land turtles that usually live in relatively well-drained, sandy soils generally associated with longleaf pine and dry oak sandhills.

They also live in scrub, dry hammock, pine flatwoods, dry prairie, coastal grasslands and dunes, mixed hardwood-pine communities, and a variety of habitats that have been disturbed or altered by man, such as power line rights-of-way, and along roadsides.

Gopher tortoises grow to be up to 15 inches long and weigh from eight to 15 pounds. With their strong elephant-like back legs and front feet specialized for digging, they are well-adapted to burrowing. The burrows provide gopher tortoises with protection from predators and from the elements by maintaining a fairly constant environment inside. They are most active in the warmer months but spend most of their lives in their burrows. Each tortoise will dig and use many burrows throughout the active season. The burrows can vary from three to 52 feet long and nine to 23 feet deep.

Their burrows also provide refuge for about 360 other species throughout its range. Some of those species include black pine snakes, gopher frogs, Florida mice, foxes, skunks, opossums, rabbits, quail, armadillos, burrowing owls, snakes, lizards, frogs, toads, and many invertebrates.

Gopher tortoises can live up to 80 years in the wild and more than 100 years in captivity. They are slow to reach sexual maturity at 10 to 20 years old and they have a low reproductive rate. Only about 3-5% of the young tortoises typically survive. They lay their eggs at the entrance of their burrows to capture the heat, which makes it easy for predators like opossums and raccoons to eat them.

Primarily herbivorous creatures, gopher tortoises eat grasses, mushrooms, saw palmetto berries, and prickly pear cactus pads, fruits and flowers, as well as blackberries, blueberries, gopher apples and other low-growing fruits.

Habitat destruction is a significant threat to gopher tortoises. Threats to the gopher tortoise also include habitat fragmentation and degradation, predation, inadequacy of regulatory mechanisms, and incompatible use of herbicides in forest management and some silvicultural activities.

*(Continued from page 7)*

Gopher tortoises need large parcels of undeveloped land not fragmented by roads, buildings, parking lots, and other structures. Such barriers in natural habitat limit food availability and burrow space for tortoises plus expose them to closer contact with humans and their vehicles. Road-kill is one of the major causes of death for adult tortoises. And, although removing gopher tortoises from their homes is against the law, they are so easy to catch that some people continue to kill and eat them or keep them as pets.

## HOSPITALITY COMMITTEE

On April 14<sup>th</sup>, we had our 2<sup>nd</sup> Ladies of the HBPOA breakfast. The Silver Dolphin hosted us and there were about 20 ladies in attendance. We seem to have no lack of ideas for starting conversation but we always have a backup plan. This month we decided to find out how much we all knew about the Hernando Beach area by playing trivia. Want to test your knowledge? Here is just a sample of the 30 questions we had:

1. What 's the Lazy Lizard's resident gator named?
2. What is the meaning of the word "Osowaw"?
3. What's the phrase used when you want a local restaurant to prepare your catch?
4. When was the first mermaid show at Weeki Wachee Springs?
5. Which local restaurant hosts trivia?
6. When is scalloping season?
7. Who was the developer of Hernando Beach?
8. How many acres is the Weeki Wachee Preserve?
9. What was the price of the first lots sold in 1958?
10. What was the original name for Hernando Beach?

Answers: 1) Buddy; 2) Bird, in the Seminole language; 3) You Hook It, We Cook It; 4) October 13, 1947; 5) The Drunken Mullet Tuesdays @7pm; 6) July – September; 7) Charlie Sasser; 8) 11,206 acres; 9) \$595; 10) Gulf Coast Resorts

How did you do? Are you a novice and need more info on the area or do you know this area like the back of your hand and could easily get a job as a tour guide?

Scalloping season is right around the corner, this year: beginning July 1 and ending September 24. Remember that you'll need a salt water fishing license if you take your boat out to scallop. A snorkel, fins, mask, mesh bag, and dive flag are all that you'll need to start out. Be sure to take snacks, water, and sunscreen as well. These little bivalve mollusks swim so they may not be as easy to catch as you think. I'm sure everyone has their favorite spot where there's about 3-6 feet of water and lots of sea grass. Be watchful of others and have fun! If you don't want to get a fishing license and all the swim gear then arrange a guided tour (Crystal River) and they will take care of everything for you. Be sure to not go above the limit of 2 gallons of whole scallops per person. Please visit: <https://myfwc.com/fishing/saltwater/recreational/bay-scallops/> for more information on limits and regulations.

## WATERWAYS

Waterways Maintenance Division (Boating and Waterways) is responsible for maintaining the County's network of aids-to-navigation, docks, piers, lights, and buoys in a manner consistent with applicable state and federal regulations.

In addition, our well-trained Waterways personnel assist and support public safety emergencies (removing fallen trees, debris and other obstructions) and issues pertaining to waterways and waterfront property.

These trade-persons must be expert scuba divers, be able to use tools such as underwater chain saws and be able to pilot water craft in order to accomplish their work.

Maintained Waterways and Boat Ramps:

- Bayport
- Jenkins Creek
- Hernando Beach Boat Ramp
- Weeki Wachee/Rogers Park
- Hunters Lake
- Lake Lindsey
- Mountain Lake
- Withlacoochee/Nobleton

## Mike Fulford for County Commissioner

- ❖ Combat Veteran and Bronze Star Recipient
- ❖ Community Leader
- ❖ Fiscal Conservative
- ❖ Supports the 2nd Amendment and property owners rights

## CHANGE

By: Mike Fulford

Change is hard, especially if for 20(+) years, we have become accustomed to a certain set of expectations and conditions. Change is occurring in front of our eyes in our national politics, our culture, the technological world around us, and within our Hernando Beach community. Our County Administrator recently reported that Hernando County is the third fastest growing county in the State of Florida. Growth has and will continue to impact our infrastructure and the services we have become accustomed to receiving. Hernando County is in transition, and as I was told years ago, Florida is not making anymore waterfront property.

I grew up on the east coast of Florida, in a community where I could drive my car unto the beach. Now there is a paved parking lot with parking meters. I don't like it much, but if you do not feed the meter, I get to pay the parking ticket. So I focus on the positive, which is controlled access to a beautiful place for posterity. Within the last three months within eye sight of my home, three new sea walls have been constructed. Almost on a daily basis I see out of state, or for that matter in state tags on cars looking

at empty lots and homes for sale. Hernando Beach is changing before our eyes. I get it. If you moved here in the 1970's-1990's things are changing and it can be discouraging and flat out depressing. In 1995, I visited the Court House in Brooksville, and I was able to park on the square. I was greeted by the person that I was going to have a meeting with as he walked out of the front door of the Court House... which now has been blocked for years. I took my mom back to the old homestead a couple of years ago, and almost got lost trying to find it.

The Planning and Zoning Commission has approved about 600(+) potential new home sites county wide since January of this year. Hernando County and Hernando Beach has been discovered. I ask myself how as a community do we deal with that? One strategy is to "bunker down" and fight any sort of change. Here recently that has not fared well, especially when it goes to the courts. The other extreme is to "let it all go" and throw up our hands and accept whatever comes. In my opinion also not an appropriate strategy. The third option is for the community to join together and have a reasonable-productive discussion where parties compromise and solidify with one voice, that can be presented to our legislative body in

## WHY COASTLINE

### I-Beam Construction

Canopy frames endure stress. The design of the I-beam makes it capable of bending under high stress instead of buckling. I-beams are used in almost every type of construction.

### Attention to Detail

Thinking about installing a canopy on your boatlift? Coastline Boatlift Covers can help by designing a custom solution to enhance your boatlift.

### 4 Supports are Better Than 3

Would you rather protect your investment with 3 supports or 4? We choose the strongest every time. Why take shortcuts on durability?

(Continued from page 17)

Brooksville to control our destiny, and chart a path to find calm seas and fair winds.

Here are some recommended steps from an article I read on workplace change, and how to deal with it. Change will come whether we like it or not. Remember life before cell phones? I do.

1. Acknowledge the change.
2. Face your fears.
3. Confront your feelings and seek support.
4. Stop the fearful thoughts and replace them with something positive.
5. Be flexible and embracing of change.
6. Be part of the change and most importantly help influence the outcome of that change.
7. See the big picture.
8. The bottom line is, change is inevitable.

Change can be frightening and disruptive. However, with the right attitude, outlook and actions, we can find opportunities in that change. We can't control the wind, but we can set our sails. Fair winds and calm seas everyone.
