

Eye Wellness Examination

Dr. Patel is pleased to provide her patients with advanced imaging of the eye. The Eye Wellness feature of your eye exam is high resolution imaging of your retina*. You can expect this testing to be fast easy and comfortable. **We will use it to gain a high resolution image of the retinal surface, screen for eye disease and improve our ability thoroughly view your internal retinal health.** It will also allow us to document, review, and compare your retina over time.

Dr. Patel is concerned about eye diseases **including but not limited to macular degeneration, glaucoma, diabetic eye disease.** All of which can be silent early on but can eventually lead vision loss or blindness.

Many vision service plans allow a Wellness screening at an additional cost to complement a regular vision exam. **Dr. Patel will perform this at a reduced cost of \$49 to all her patients including those without a vision plan.** She does not use this as a replacement to a standard dilated eye exam but rather to complement it and allow for a more thorough evaluation of your eye health.

If you **DO NOT** wish to have the Eye wellness screening please check the box.
