Inspire My Path

Eagles are admired around the world for their freedom, power and for their greatness. The bald eagle is the most unique due to its distinctive brown body, white head and tail that you make you notice from afar. The bald eagle rarely flaps its wings but soars instead, holding its wings wide and flat. There is a lesson to be learned from these beautiful birds. An eagle knows when a storm is approaching before the storm arrives. The eagle will fly to a high spot and wait for the winds to come. When the storm hits, it sets its wings so that the wind will pick it up and lift it above the storm, so that while the storm rages below, the eagle is soaring above it. The eagle does not escape the storm. It uses the storm to lift it higher. They rise on the winds that bring the storm. Often times in our lives, we let the storms beat us down till we can't take anymore or we hide away to avoid going through the hardships. But let us be like eagles, and use the storms of life to lift ourselves higher, and to be the very definition of greatness.

We are currently accepting pictures of you and your pets for our Cutest Pet Photo Contest that is held monthly. All pictures will be judged on the 20th of each month, and the winner will get their picture on the following monthly newsletter. Submit all photos to: rberry@thespeechpath.com
