Who is NEI Energy?

NEI Energy is a PV Solar System Installation Contractor/PV Construction Management Company, that specializes in the complete assembly and installation of Commercial/Industrial Rooftop Solar Arrays. Our experienced team of professional technicians ensure a complete, on schedule, high quality PV System installation, tailored to meet the needs of PV Project Developers, as well as Commercial and Industrial building owners. Think of NEI as the capitol "C" in EPC.

NEI Energy employs "in-house" boots on the ground, owns the equipment needed to complete the project, and has an experienced team of project management professionals. These resources ensure we mobilize/scale quickly, which drive project schedule while maintaining the high quality our customers expect.

Team Expertise

NEI has over 35 years of onsite Construction, Commercial Roofing and Project Management experience. We are an approved/certified installer of all Tier 1 PV Racking Manufacturers, whom we maintain strong relationships with in an effort to keep our team up to speed on all of the latest advancements in product/system design.

NEI's construction team works closely with the Project Developers Design Engineers to ensure efficient construction in the field, and to verify the proper solution is being utilized to suit the existing facility conditions. Our construction industry experience ensures our clients will get a quality product, while maintaining the construction schedule and reducing installation costs.

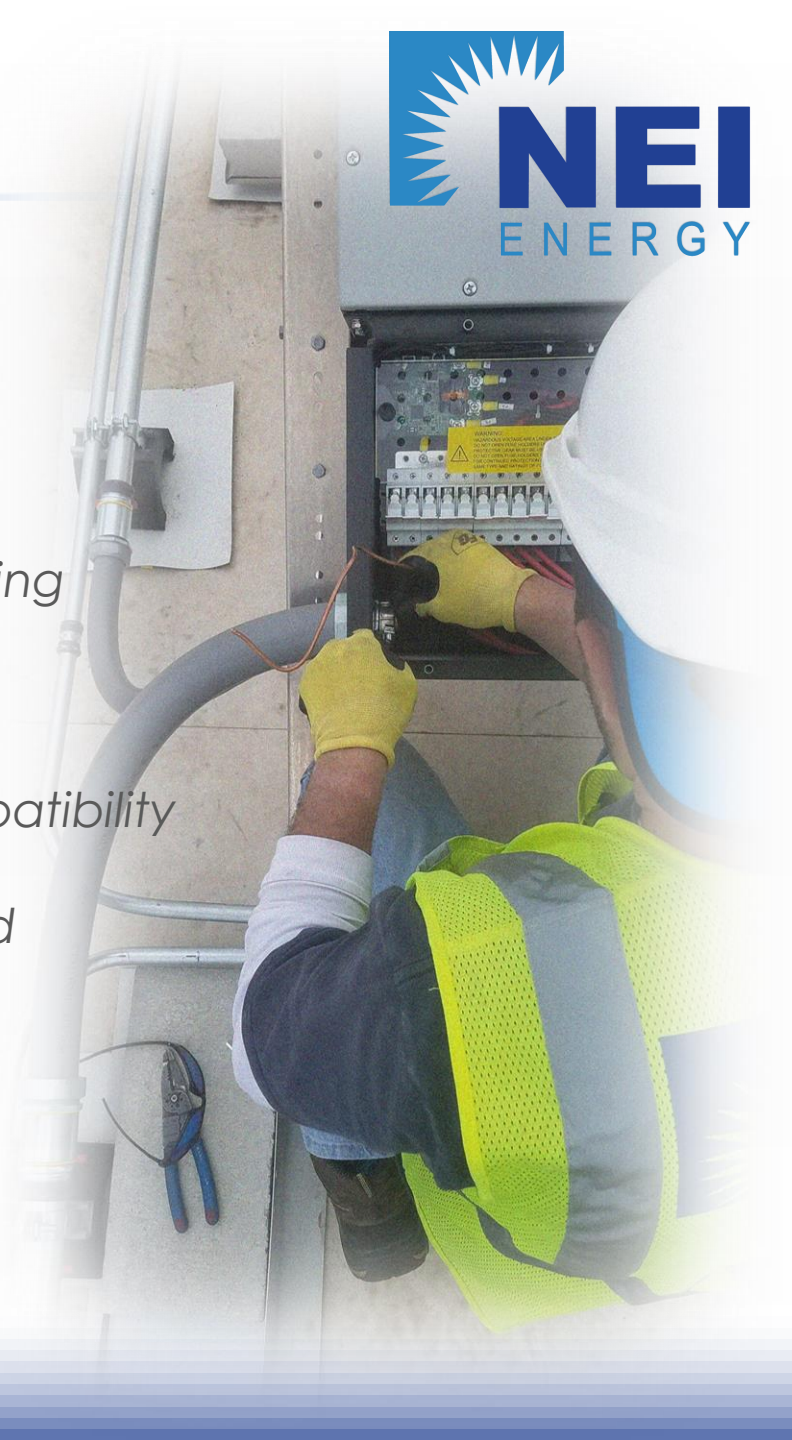

NEI is an industry leader in the integration of Roof Mounted PV Solar to building facilities in both the private, and public sectors.

The Value of a Capable Partner

- *Roof Top Solar System Installation Services*
- *Electrical & BOS Installation*
- *PV Construction Management and Consulting*
- *BOS Component Optimization Support*
- *Existing Roof Surveys to Determine PV Compatibility*
- *Commercial Roofing Manufacturer Certified*
- *General Contracting Expertise*
- *Complete Project Bonding Capability*

NEI Energy Executive Team Bios

Rich Milanese, Managing Partner

Rich is responsible for all business development activities for NEI Energy, driving all strategic marketing and sales endeavors. Before launching NEI Energy, Rich served in various executive leadership positions for tier 1 companies within the project development, distribution, and EPC side of the solar industry. During that time, he provided expert consultation to building owners, developers, solar integrators and EPC contractors for the integration of PV solar to their facilities as well as financial sourcing capabilities. Rich holds a Class A General Contractors License and Roofing Contractors License. Rich is a graduate of the University of Miami with a BBA in Business Management and Finance.

John Penton, Managing Director

John is responsible for oversight of construction operations for NEI Energy. With over 25 years of experience in the construction and roofing industry, and 10 years of experience in the commercial solar industry, John has the expertise to focus on project and construction management for any size job, and the ability to manage lengthy, complicated projects from conception to completion. John received his Bachelor of Science Degree at the University of Scranton and holds an OSHA 30 certificate.

Corey Penton, Director Field Operations

Corey is responsible for all field operations and manages a staff of 40+ skilled technicians in both mechanical and electrical PV installation. Corey's 20 years of commercial roofing & general construction experience ensures timely PV installation, execution, OSHA safety & quality. Over the past eight years he has installed all tier 1 solar manufacturer products on both roof and ground mount PV installations. Corey attended Gulf Coast University and studied Engineering & Architecture. He is a licensed roofing contractor and is OSHA 30 Safety Certified.

NEI Energy Management Team Bios

Taylor Whitson, Project Manager / QAQC

Taylor is responsible for Project Management, Quality Assurance and Quality Control. Taylor has supported clients in North America and European markets for over four years, and has played an active role in pre-construction, construction, and due diligence advisory roles on over 200 MW of ground mount and rooftop projects. These projects have ranged from large-scale utility fixed and tracker systems to rooftop C&I projects and his quality-focused involvement has ranged from pre-construction to post commissioning and operations and maintenance of the plant. Mr. Whitson has also worked as a logistics coordinator and an in-field quality assurance manager for a utility-scale solar EPC firm in North Carolina. Taylor holds a dual degree in Italian and International Business Administration from Temple University in Philadelphia, PA.

Stephen Termotto, Project Manager / QAQC

Steve is responsible for Project Management, Quality Assurance and Quality Control in our New Jersey office. Steve has over 10 years of experience as a Solar Installation Technician, and Operations & Maintenance Engineer. He has been responsible for optimizing the performance of over 50MW of solar projects spread over 140 commercial-scale projects, including procurement, repairs, permitting, and design/implementation of post commissioning procedures. Steve holds a Bachelor of Science in Business Administration from Rowan University in Glassboro, NJ.

Bonnie Brown, Office Manager

Bonnie is responsible for managing NEI Energy's office operations. Bonnie's expertise Customer Relationship Management, Sales Support and Marketing Communications, provides the perfect foundation for supporting our customers and staff throughout the PV Installation process. Bonnie is a certified CRM System Administrator and a graduate from Naugatuck Community College with a license in Emergency Medical Services.
