T & Th: 3-8

Dr. Gerry M & W: 1-8
F: 9-5
S: 9-1

Why Should You and Your Family See a Chiropractor Regularly?

- 1 Every day of your life you either grow a little bit stronger or a little bit weaker.
- 2 If you want to grow stronger rather than weaker, your brain must be able to correctly comprehend and respond to everything both inside and outside of your body.
- 3 In order for that to happen, you must have a clear connection in the nerves between your brain and all of the different parts of your body.
- 4 Because of how closely connected your spine and nerve system are, to have a clear brain body connection, you must also have an optimally aligned and functioning spine.
- 5 Chiropractors help you make sure that your spine is functioning as optimally as possible, so that you have the best and clearest brain body connection possible.

This allows your brain to better comprehend and respond to everything and helps you function and heal normally, so that you can spend more days of your life growing stronger rather than weaker.
