

Biology II-Human Anatomy and Physiology

Textbook:

Exploring Creation with Advanced Biology-Human Body 2nd edition by Shannon and Yunis

Exploring Creation with Advanced Student Notebook

Textbooks are to be purchased prior to the first class day and brought to each class.

Grade range: 11th-12th grade

Prerequisites: Biology I and Chemistry I

Supplies needed: 1" 3-ring binder, dividers, notebook paper, pencils, colored pencils and sharpener, ruler, folder, highlighter, one composition notebook

Course cost is \$315/semester or \$560/ year. A non-refundable supply fee of \$70 to cover lab supplies is due before the first class.

This course will provide an in-depth look at the anatomy and physiology of each of the human body's organ systems. This class will include microscopy and several dissections.

Students will need to stay current with their work to get the most out of this course. Students will be expected to spend 4-6 hours per week on reading, studying, and homework. We will cover one module about every two weeks in order to finish the book.

This course will include labs to help the students understand the concepts more completely. A lab notebook will be kept and lab reports will be written for several labs throughout the year. This will be good practice for college level science classes. Students will be graded on most assignments and are expected to turn in completed assignments at the next class meeting. Late assignments will be accepted at the instructor's discretion.

If there are any other questions about the course, please contact me at vivneal@gmail.com
