How To Professionally And Cost-Effectively Stretch Banners

Our different aluminum extrusions have different numbers of channels where the graphics can be inserted and stretched.

Let's review the possibilities we have with each extrusion.

Top of Page

TS22 - ONE FRONT CHANNEL

The TS22 aluminum extrusion has one channel on the front. This means that the white or black PVC strip will be visible all around the frame.

TS32 - 3 CHANNELS

The graphics can be stretched with the PVC locking strip inserted to the front , the side and the rear of the extrusion

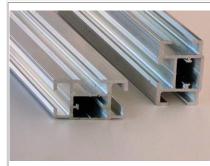

When the graphic is fixed from the rear, it wraps entirely the frame.

Designed for medium and large size framed banners and signs for:

- Advertising
- Construction sites
- · Architectural applications (Walls, ceiling...)
- Sports Events
- · Shops, malls decorations
