Alan Drobnak - A J Designs

I create copper tensor ring devices infused with quantum scalar frequencies which are beneficial to our mental, physical and spiritual well being. The are designed to assist our evolving human condition My devices are the next plateau of tensor ring development.

I've devoted years of study to unseen energies primarily in research of the work by Tesla, Rife, Emoto, Spurling, Russian discoveries, current Quantum Biologists and ancient tools. Through this I've arrived at a means to employ benevolent quantum frequencies which interact with our physical body as well as higher self. I am grateful for for this journey and now share these powerful tools.
