

BAKING FROM SCRATCH

Lil Miss Coder December Activity
Student Leader: Tanvi Naik

AGENDA

- Welcome
- Call for Last Month's Challenge
- Introduce Project
- Walk through Project
- Introduce Challenge
- Demo Last Month's Challenge

GET READY

Please go to lilmisscoder.com for Scratch activity, located under the “Event” page!

December 5th -- Baking from Scratch

EVENT DETAILS:

Virtual Event: 1-1:40 pm (CT)

EVENT CONTENTS:

We will be using code to create a baking game!

Please make a Scratch account prior to the event. You can find the link below.
Please use full names of the girls, along with grades in the Zoom call.

INTRODUCE ACTIVITY

- Last month we played with rocketship, but this month, we're baking from scratch. In both projects, we're using the program Scratch!
 - Today, we will be using sequences to help us create a game to bake.
- Please open attached instructions to follow along

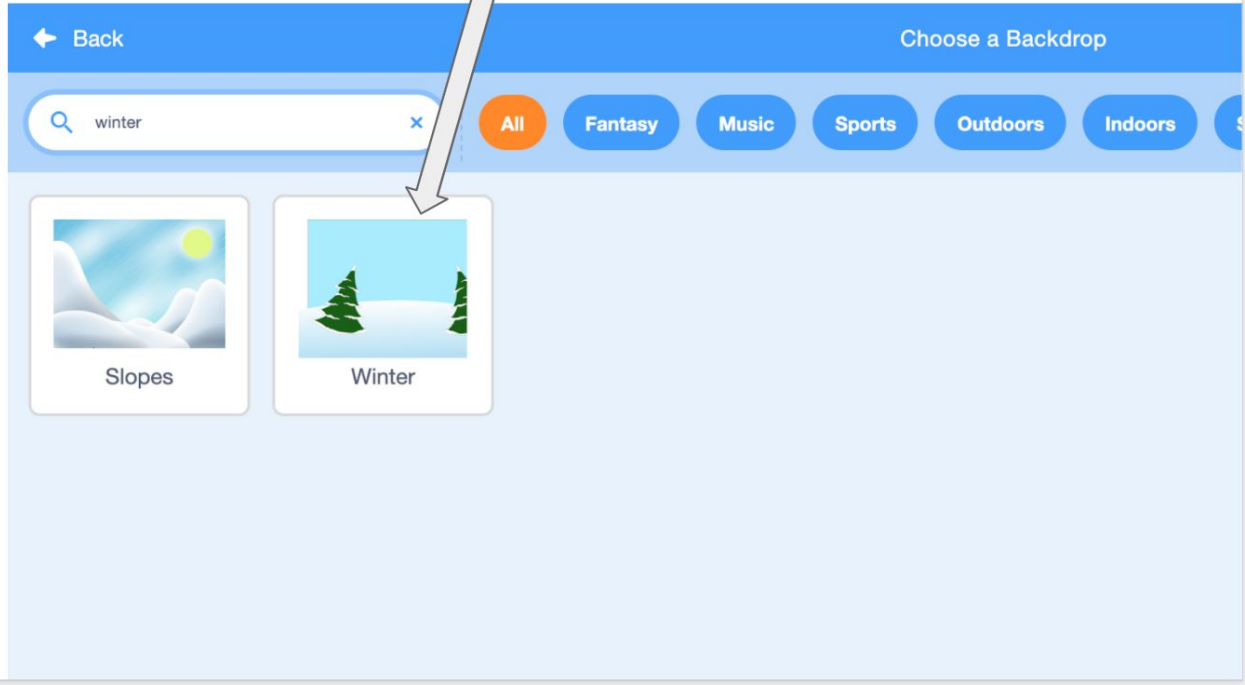

ACTIVITY

- Let's go to Scratch and open a new project!

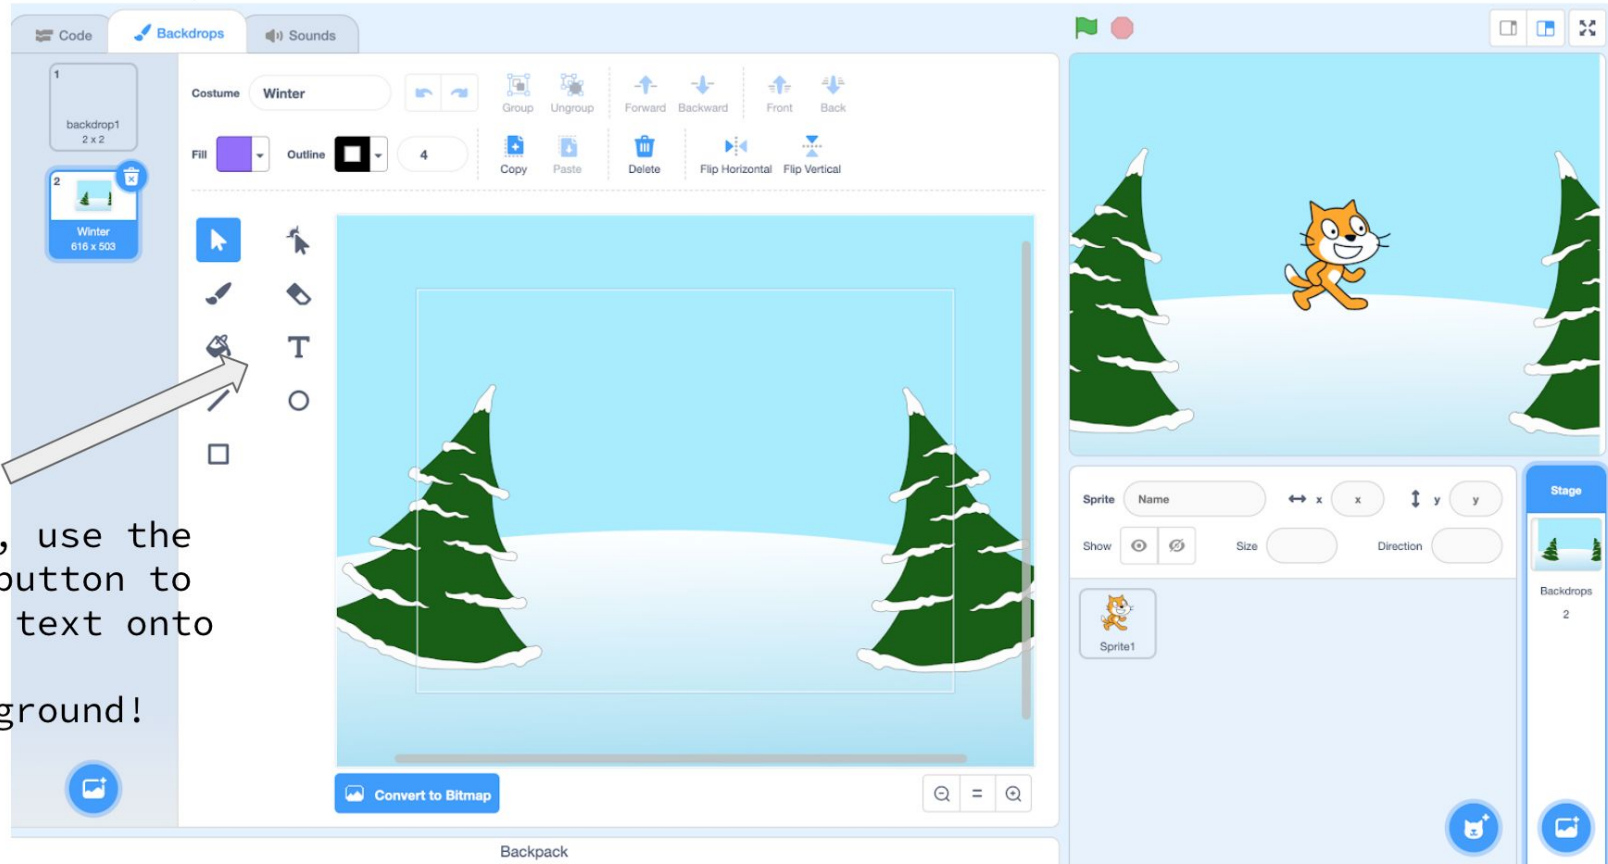

STEP 1: SETTING UP THE BACKGROUND

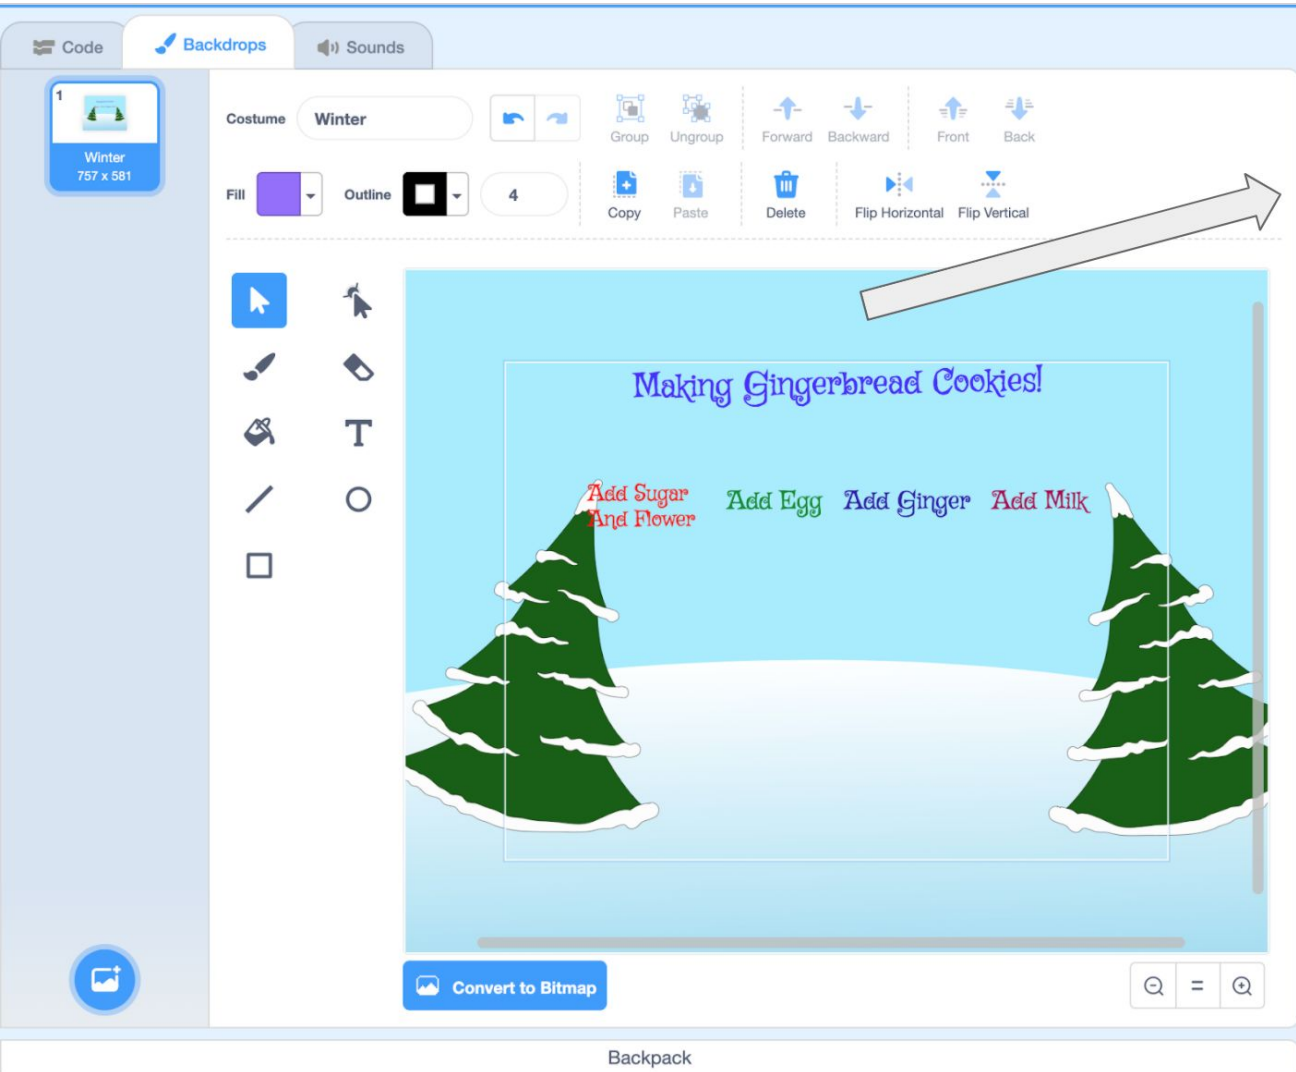

Click "search" and
type in "winter"

Click the
“Backdrops” tab

Then, use the
“T” button to
type text onto
our
background!

Type out our text and position it.

Use fun text fonts and colors!

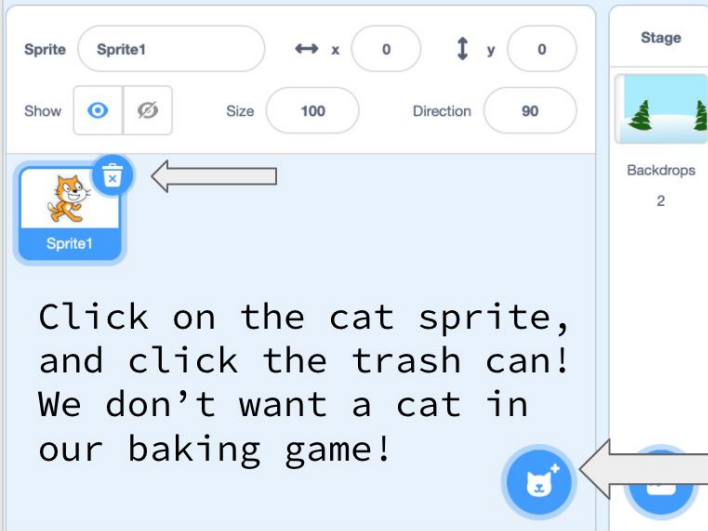

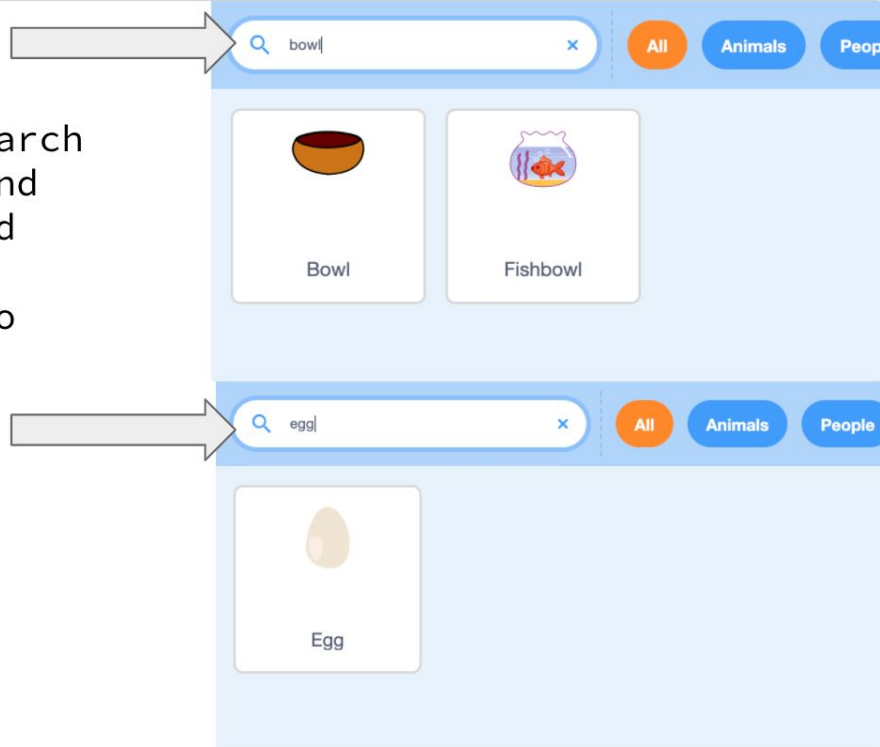

STEP 2: TIME TO ADD SPRITES

Last month, we used a rocketship for one of our sprites!

This month, our different ingredients, bowls, and more will be our sprites!

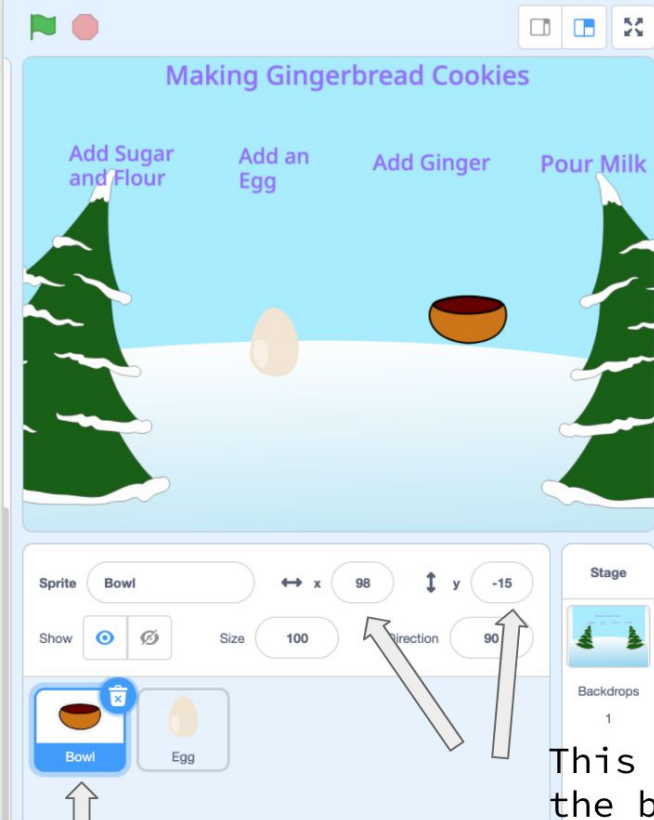

Let's search
"bowl" and
"egg" and
add our
first two
sprites!

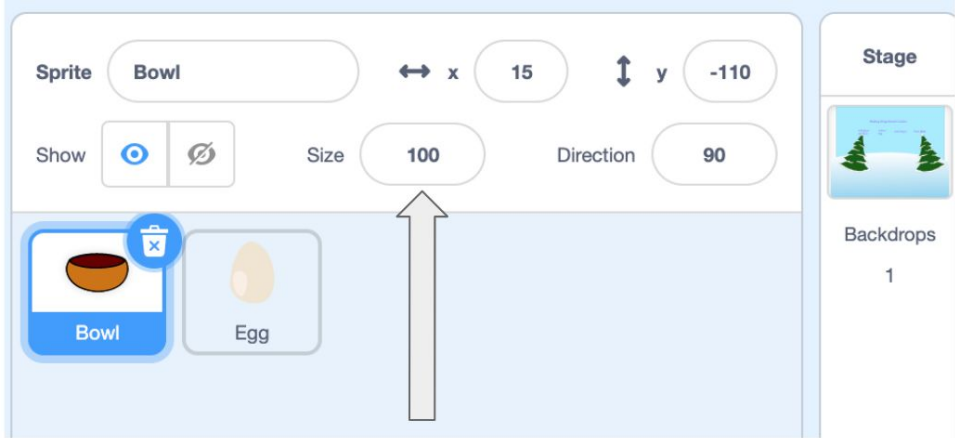

Click on the cat sprite,
and click the trash can!
We don't want a cat in
our baking game!

Then, click this button
to add new sprites!

(Make sure the "bowl" sprite is clicked!)

This lets us change the bowl's "address"! The x number will move it left and right, while the y number will move it up and down!

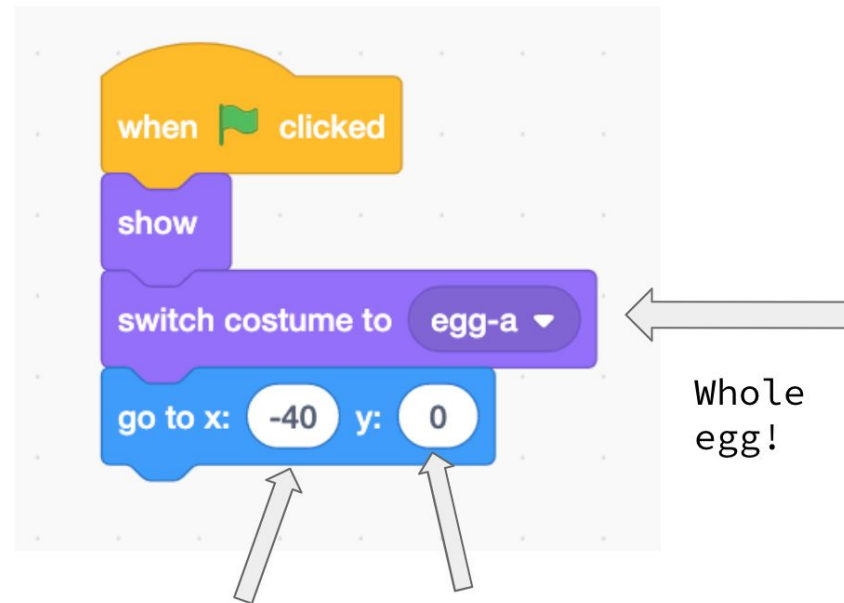

This number make our sprite bigger or smaller! Make it bigger! Try 150?

Let's change the address to $x = 15$, and $y = -110$

TIME TO CODE OUR FIRST INGREDIENT- THE EGG!

This will
make the egg
look cracked!

Whole
egg!

This number will be
different for everyone,
since it goes underneath
the "Add Egg" label.

CHALLENGE

YOUR Challenge!

Until next month, use the second attached instructions to help you finish the base of our game, then play around and try to make it as realistic as possible.

What does it mean?

You can add sounds to the ingredients, add more ingredients, use cool pictures on the internet as our sprites, create a fun ending, and so much more!

Have fun with it and explore!

DEMO LAST MONTH

Challengers, please present your activity from last month.

NEXT MONTH

- Baby it's Code Outside, January 9, 2021 at 1pm
- Please submit your challenge on www.lilmisscoder.com

THANK YOU SO MUCH
FOR JOINING US
TODAY!
HAPPY HOLIDAYS
