

INTELLIGENCE ANALYST

Summary

I am a public health intelligence analyst. Some of my key skills include:

- Public health knowledge - specialising in health intelligence and the wider determinants of health.
- Effective communication skills - having worked with a wide variety of people, including senior managers and colleagues at varying levels within public sector organisations. I am experienced in writing reports for a range of audiences.
- Research and analysis - Degree-level understanding of the importance of robust evidence and where to obtain it, as well as a number of analytical data techniques to enable interpretation and dissemination of health intelligence outputs.
- Excellent organisational skills and ability to prioritise - I am experienced in working autonomously, managing a diverse workload with competing priorities and multiple deadlines. I also have experience managing staff, and utilise good project management skills on a regular basis.
