November 11, 2014

To whom it may concern,

I would like to introduce Brian Gurl, pianist, singer and entertainer, who performed at our Sugar Bowl Fund fund raiser on November 2, 2014.

Brian performed for us in October, 2013 and played to about 800 people at the Venice Community Center. The comments after the performance were so overwhelming positive, that we brought him back, by popular demand, for the 2014 show.

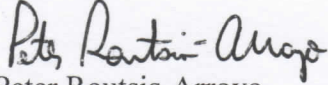

Brian performed for over 800 at the Venice Community Center. He had a three piece backup, and two female performers. The theme of the show, "A Tribute to the American Masters of Music," was arranged by Brian, and was performed for the very first time for our audience. Playing and singing music from American composers from Steven Foster to Billy Joel, arranging the music to his own unique style. Brian performed for over two hours to the total delight of the audience. Brian's primary female singer and piano player is Katherine Alexandra, a graduate of the Moscow Conservatory of Music in piano and voice. Katherine is a very talented performer in her own right.

After the show there were comments such as "You should have charged double for that show," "I would pay a lot more to see that show." Comments like that do not come lightly.

If you are planning on a show to raise funds, or for any reason, I strongly recommend that you consider Brian Gurl. Brian is more than a performer; he is a composer, arranger, producer and entertainer. Brian has many different shows that he performs and his repertoire covers songs from Classic to Rock and Roll. He will tailor his shows for the occasion and the audience.

You will not be disappointed.

Regards,

  
Peter Routsis-Arroyo  
Chief Executive Officer
