

# Wargrounds of the Nine Worlds

## *The Last Battlefield!!*

*Both sides have fought long and hard and the time has come to end the conflict once and for all. The horizon darkens as the earth shakes with the rumble of warmachines and booted feet. If this is our last battlefield, then the heavens will shake with our fury! Let the stars know we were here and remember our names!*

### **Mission:**

**The Armies:** Both players should agree on a power level/points value for the game. One side should declare as Attacker or Defender.

**The Battlefield:** Players should create a battlefield to match the planet or warzone they are fighting over and add terrain as needed. Also add any factors a Battlezone they choose to play in adds, and alter accordingly. Players should alternate placing 6 objective markers before the battle using the standard setup rules for Objectives.

**Deployment:** Players roll off with the winner choosing the deployment type, and the other player deciding which will be their deployment zone. The player that didn't choose the deployment zone then places their first unit and then alternate until the armies are deployed.

**First Turn:** Players roll off and the player that finished setting up first adds +1 to their total. They may choose who goes first. If they choose to go first the other player may seize the initiative on a dice roll of a 6.

**Kill 'Em All!** At the end of each Battle Round, if more units from their opponents army were destroyed during the battle round than their own, the player scores 1 Victory Point.

**Desperate Fighting:** Each player adds up the Power Ratings of all enemy units that were destroyed during the battle, the player with the highest total adds 3 Victory Points.

### **Slay the Warlord, First Blood, and Linebreaker**

**Battle Length:** The game ends at the end of the Fifth Battle Round.

**Campaign event:** Bolstered Ranks.
