

Clean. Reliable. Innovative.

Liquid Environmental Solutions (LES) is the largest national service provider in the transfer and disposal of non hazardous liquid waste. With a fleet of over 400 vehicles, 54 collection branches, and 24 treatment facilities across the country, their services include waste collection, transportation, processing, recycling, reclamation, and disposal.

Their industry-leading automated scheduling system can plan your maintenance visits for you. They fully evacuate, pressure wash, and scrape the sides of every grease interceptor, allowing them to clearly inspect your trap and increase the longevity of your asset.

A comprehensive report will be provided upon completion, as well as documented and available for use online.

LES will work directly with your jurisdictions in filing the reports to ensure compliance. Should you choose to follow their recommended frequency,

LES will guarantee your compliance and assume responsibility of any related citations.
