Dr. Jie Du (JDP Therapeutics Inc) Presented at Forum 2014 Leadership Symposium

BLUE BELL, PENNSYLVANIA, APRIL 28, 2014 – JDP Therapeutics Inc., a privately held specialty pharmaceutical company, is pleased to announce that the Company’s CEO Dr. Jie Du presented at the Forum 2014 Leadership Symposium, Session B: Driving Entrepreneurship in the Region: “Women Innovators and Investors ... their successes, challenges, and hopes for the future”. This symposium was held in Philadelphia on April 25, 2014. As one of the panel members at this symposium, Dr. Du presented her view of entrepreneurship including her own involvement in starting and exiting pharmaceutical/biotech companies. She also shared her successes, disappointments, and lessons learned from her experience in founding and operating JDP Therapeutics Inc. and its lead product JDP-205.

About JDP-205

JDP-205 is a proprietary injectable product being developed for the treatment of acute allergic reactions for the hospital market. A market QUANT study surveyed 110 physicians, and revealed that 86% of responding doctors had indicated readiness to use JDP-205 in place of the current therapy when the product is approved by the FDA. A second independent market research study with in-depth clinician interviews confirmed the findings.

Acute allergic reaction is a serious condition, potentially life-threatening, and has been growing at concerning rates with very limited selections of medications for treatment. JDP-205 will offer an alternative and superior treatment to the current therapy for the first time in nearly 60 years.

About JDP Therapeutics Inc.

JDP Therapeutics Inc. is a privately held, clinical stage specialty pharmaceutical company focused on developing small molecule therapeutics to treat life threatening diseases with significant unmet medical needs, primarily for use of acute care in the hospital setting.

JDP Therapeutics pursues unfulfilled opportunities in existing molecules from which it develops unique dosage forms, novel formulations, and new indications to achieve full therapeutic and market potential. This approach mitigates risk, shortens the development cycle, leads to a well-

defined regulatory pathway, and fully characterizes clinical needs for each product opportunity.
