## Recently

Managed IMA 2015 Digital Resource integration project

Manage ongoing support for 59 digital texts across 10 platforms and counting.

## Passion

**Solving problems** with the appropriate application of technology. **Continuous improvement.**

## District Stats

35,000+ students

2,500+ teachers

# What is a digital resource?

---

Any resource delivered digitally...

- Textbooks
- Instructional activities
- Assessments
- Manipulatives
- Games used to reinforce skills

# What do you mean by Integration?

---

In the context of digital resources, we mean taking data from

- Your Student System
- Your HR System or Identity Management System
- Your district user account store (e.g., Active Directory, Google Apps, eDirectory, etc.)

and then sending the data to a digital resource platform.

# A Brief History in Irving ISD

---

## Prior to 2014

- Decentralized, little integration, no true SSO

## 2014-2015

- Large IMA digital adoption demanded SSO and integration, but it was new for **everyone**. Took longer than planned.

## 2015-2016

- More IMA digital adoptions. More SSO, more integration. **More success.**

# Why Integrate?

---

Imagine you are **Jacob**, a **3<sup>rd</sup>** grade student in Low-Tech ISD without integration or SSO:

Subject	Platform	Username	Password
Social Studies	Pearson Realize	<b>jacsmith@stu.irvingisd.net</b>	<b>11234AB</b>
Science	ThinkCentral	<b>jacsmith@stu.irvingisd.net</b>	<b>111234</b>
	STEMscopes	<b>111234</b>	<b>111234</b>
ELAR	ConnectED	<b>jacsmithiisd</b>	<b>111234c</b>
Math	Everyday Math	<b>jacobs2435</b>	<b>544</b>
	ReflexMath	<b>mdiaz-iisd</b>	<b>111234</b>

# Why Integrate?

---

Imagine you are **Mr. Smith, a middle school GT Science Teacher** in Low-Tech ISD with three preps.

Subject	Text to Assign	Platforms	Students	Accounts	Rosters	Assignments
6 <sup>th</sup> GT SCI	3 (6th,7th,8th)	2	30	60	60	90
6 <sup>th</sup> GT SCI	3 (6th,7th,8th)	2	30	60	60	90
7 <sup>th</sup> GT SCI	3 (6th,7th,8th)	2	30	60	60	90
7 <sup>th</sup> GT SCI	3 (6th,7th,8th)	2	30	60	60	90
8 <sup>th</sup> GT SCI	4 (6th,7th,8 <sup>th</sup> ,BIO)	2	30	60	60	120
Total			150	300	300	480

# Integration Challenges

---

Selecting the right resources

Many ways to skin this cat

Branding

Managing licenses and assignments

District IT Capability & Capacity

# Selecting the right resources

---

To improve adopting resources with adequate integration support:

- Include IT during the selection process.
- Have publishers submit a capabilities questionnaire for each package, completed by a technical person, in writing.
- Create capabilities matrix to support committee decision.
- Make sure they support your devices!

# Integration Capabilities

---

## Account Provisioning

- Teacher, Student, Instructional Support accounts

## Rosters Synchronization

- Setup and maintain classes (add/remove students)
- Access for secondary teacher (co-teacher)

## Resource Assignments

- Assigning texts to students and teachers

## Single Sign-On

# Platform Capability Matrix

Green: Preferred

Yellow: Passable

Red: Undesirable

Platform	Pub	Teacher Account	Student Account	Support Account	Co-Teacher	Add Roster	Remove Roster	Assign SE	Assign TE	SSO
Realize	Pearson	Auto	Auto	Auto	Auto	Auto	Auto	Teacher	Teacher	Yes
MathXL	Pearson	Teacher	Teacher	User	No	Teacher	Teacher	Teacher	Teacher	No
ThinkCentral	HMH	Manual Import	Manual Import	Manual Import	No	Teacher	Teacher	Teacher	Teacher	No
Holt McDougal	HMH	Manual Import	Manual Import	Manual Import	No	Once	Teacher	Teacher	Teacher	No
Big Ideas	HMH	Auto	Auto	No	No	Auto	Auto	Teacher	Teacher	Yes
ConnectedED	MHE	Auto	Auto	Auto	No	Auto	Teacher	Auto	Auto	Yes

# Many ways to skin this cat

---

The technical methods of each publishers integration are different.

If you adopt 5 publishers' resources, expect 5 different projects.

## **Exception:**

- Platform supports SSO and Sync with [clever.com](https://clever.com) (or similar service).

# Branding - a rose by any other name...

---

...is confusing if we are discussing roses.

Pick a standard convention for the platform.

- MHE ConnectED
- HMH ThinkCentral

## Documentation

- Keep a list and refer to it often
- Publish it with various groupings depending on audience

# Managing Licenses and Assignments

---

Licensing and assignments should be managed for digital like they are for print.

Easier to record Digital Resources and manage them in Textbook System separately from print material.

Integrations need data stored on these digital resource records.

# Digital Resource Record in TIPWeb

Irving ISD has requested a custom report from TIPweb with the details highlighted in yellow for use in Digital Resource Integrations and SSO.

# District IT Capability & Capacity

---

Skills needed: SQL, Scripting (SSIS, Perl, etc.), knowledge of data in SIS and possibly HR.

Don't have the skills in house, services like [clever.com](http://clever.com) can help.

If you do have the skills in house, start the discussion as soon as possible to get on their project schedule.

# Working With IT

---

With a new adoption, include Technology on your selection committee. They can help:

- Determine device compatibility
- Determine expected level of integration based on platform and in-house capabilities.
- Discuss implementation timelines.

After selecting a resource, let IT know as soon as possible and schedule time to define the project timeline and solution.

Agree on responsibility for managing parts of platform that cannot be automated or integrated.

**Provide course resource assignments in a “digestible” format.**
