

Quilt Hanging Options

By Mary Cannizzaro

Command Strips:

- At least 2 pair for each quilt depending on the size and weight.
- The picture hanging strips come in different weight parameters. I used medium weight.
- *Follow the directions on the reverse side of the package.*
- Basically - you put two strips Velcro sides together; take off one of the papers exposing the adhesive strip; press on to back of quilt. Press for a few seconds.
- While the strips are still together on the back of the quilt, remove the other paper exposing the other strip of adhesive and press to the wall. Hold for a few seconds and then separate the Velcro pieces leaving one side on the wall, the other on the quilt. Let it set for about an hour and then put quilt on wall.
- To remove, following the directions on the package.
