# 2022 Grady County Fair Honorees

## Paul Horton

Paul Horton was born in 1961 in Erie, Pennsylvania and was raised in Western Pennsylvania. Paul has been married for 35 years to wife Jo. Paul and Jo have two children, a daughter Maggie and a son Kyle. Paul has been involved in the Grady County Community for over 36 years while working as the Ross Seed Store as a manager and also volunteering with the Grady County Free Fair for about 30 years.

Paul has helped with the fair by being a long-time booth vendor, yearly sponsor of multiple events and has made various donations. He says he can remember the old days, as a booth participant, having to constantly reset the breakers because of all the fans being used. Observing the upgrades to the Fairgrounds following the Tax Initiative has been extremely satisfying.

He believes the Fairgrounds are a huge plus for our county and being a participant as the fair matured has been a blessing. Paul can't think of a place or event where you see so many farmers faces and that is the best part of the fair in his opinion; greetings, renewed friendships and conversations. Many of those conversations that started friendships happened in a booth space or on an aisle. Many of the landscaping plants were donated several years ago by Ross Seed and Paul was instrumental in making that happen.

A few of his hobbies include following the Pittsburgh Steelers, and the OKC Thunder. Paul is happy to have played a small part in making the Great County Fair that we see today. He is humbled and thankful to be one of this year's Grady County Fair Honorees.

## Steve Calhoun

Steve Calhoun was born Chickasha Oklahoma in 1953. Steve is currently married to his lovely wife Gina. A local farmer/rancher from Ninnekah, he began his participation with the Grady County Free Fair in 1962 when he exhibited 10 ears of corn and an insect collection of 25 bugs in a cigar box for his first 4-H projects.

Since that time, he has continued to participate and support the fair through exhibits, contributions and volunteering. Steve exhibited various 4-H and FFA projects, competing with livestock, crops, and his favorite – the tractor driving contest. Through the years Steve has volunteered with the Alfalfa Hay Show, Cake Show Judging and even worked booths for various groups such as Grady County Farm Bureau, Epworth UMC, and of course Ross Seed Company where he is the manager.

When Steve married Gina Hicks, the Grady County Extension Home Economist in the early 80's he naturally became a volunteer helping to set up, shelter and take down exhibits in the old WPA North Exhibit Building. Then as their children, Lauren, Clint and Robert grew up through the 4-H & FFA Programs, he again was volunteering. Steve has even continued that practice by volunteering as the 'ringman' at the pet show last year.

Steve believes strongly that the 4-H and FFA programs are excellent ways for young people to develop skills, leadership and good character. Steve says that participating and supporting the Grady County Free Fair is just one way to give back to a community that has supported him throughout his lifetime.

# 2022 Grady County Fair Honorees

## Clara Hodges Green

Clara Hodges Green was born in Banner, Oklahoma in 1942 and raised in Lindsay where she graduated from Lindsay High School. Clara was married to the love of her life Geary for almost 61 years until she lost him in April of 2022. Clara and Geary have 3 children, Lorrie Windom and her husband Bruce, Austin and his wife Tracy, and Kerri Green. 6 Grandchildren and 5 Great Grand Children.

In August of 1982, Clara and family moved to Grady County from Dalhart, TX. Two weeks later the fair happened and Clara didn't have a clue what to do. For 33 years she stuck around taking entries. One thing she remembers is when they went to the barn with no air conditioning, one of the celebrities from a tv station came down to judge an event. This celebrity wore a suede skirt, leather jacket and boots, needless to say she was way too hot and never came back.

For the past almost 40 years, Clara has helped with nearly every aspect of the fair including 4-H, OHCE, Livestock shows, Open class, etc. Not only has she helped for many years with the Fair, when Clara worked at OSU Extension, she also handling bookings for the Fairgrounds and had to coordinate with Fairgrounds personnel which was extremely nerve wracking.

Before helping with the fair, she didn't realize how much preparation is involved. What most people don't understand is that a week after the fair, you start getting dates, judges and etc. for the following year. It takes more than one person and every job is important. Almost every place that I go, I see someone that I have met from being involved with the Fair. One of the most positive areas of the fair is seeing the growth of the young people and their excitement from bringing in their first exhibit or baked good and now seeing those same once kids, bringing their own kids to do the same thing. Clara feels it is very gratifying to think that she had a small part of their growth.

Along with the Fair, Clara enjoys reading and following her grandchildren to their sporting events. She is an avid OSU fan and loves going to their games. She has many places planned to visit before her husband passed. She wants everyone to remember to do things on your bucket list while you still can. She was completely surprised and honored to be one of this year's Grady County Fair Honorees.

Congratulations to all of our Grady County Fair Honoree's.

Without the support of people like these in our community we would not be able to continue the success of our Fair.

Please come to support them on Thursday, August 25<sup>th</sup> at 6pm to show your appreciation.

- How did you change your design to improve it?
- Did you retest it? Did the results improve?
- Describe your final design and does it work?

Engineering Design Challenges will be judged based on creativity, design, function, and recordkeeping (journal or engineering notebook).

**Juniors - grades 3-7**

**Seniors – grades 8-12.**

### **Marshmallow catapult challenge design task**

Design a trebuchet-style swing arm catapult. It may be similar to a teeter-totter or swing set. The beam (arm) is able to swing (go up and down). The arm of the catapult must be adjustable from the center to an offset (One side of the beam is longer from center pivot point.). Use at least five (5) different types of materials or parts (craft sticks, brads, dowels, etc.). Use weights and gravity as the power source. Catapult cannot be any larger than a 3 foot cube (3' X 3' X 3')

Launch a marshmallow at least six (6) feet. A journal or engineering notebook should be included to describe the creation, purpose and function of the device. Explain how you built and tested your catapult. Chart your marshmallow launches.

### **Rubber Band-Powered Vehicle Design Challenge**

**Design a wheel-driven vehicle, powered only by one rubber band (size #64 approx. ¼" wide by 3½" long by 1/32" thick.), which will transport a one-pound "load" (box of baking soda approx. size: 3½" x 4½" x 2") at least 9 feet (on a smooth flat floor) while remaining within the boundaries of a 3 ft. wide parallel track (marked off with masking tape). Speed is not a criteria.**

There are no restrictions on materials, size, weight or number of wheels. However, the only energy source permitted is the elastic energy of one rubber band. Commercially assembled vehicles are NOT permitted. However, commercially manufactured components may be used as parts of the vehicle. The vehicle must be self-starting (i.e., no pushing, external power starts, etc.). Propulsion of the vehicle must be through the wheels (i.e., no propellers, no launching mechanism). Transferring the energy of the rubber band to wheels via gears, fly wheels, etc., is encouraged. No remote-control devices are permitted.

**A journal or engineering notebook should be included to describe the creation, purpose and function of the device. Explain how you built and tested your vehicle and if you made any modifications. Chart or graph collected data and explain how you measured improvements in your engineering notebook or journal.**

### **The Future of Agriculture Research Challenge Displays**

The future of agriculture research displays will illustrate current research and forward/futuristic thinking that is changing the field agriculture and agricultural based careers. 4-H members will research

current trends, future thoughts and ideas for continuing to effectively feed the world. These projects should have a minimum of three scholarly references identifying where and when the information was published.

These projects may:

- Describe the challenging need for increased food production for a growing population
- Describe a new agricultural production technique or an emerging agricultural technology that will enhance or improve our agricultural and food production systems,
- Illustrate a new vision for the future of agriculture
- Describe new STEM-based careers in agriculture.

Research displays should use research-based information and resources to answer questions similar to the following, “What will the future of Agriculture look like?”, “How will agriculturalist feed an ever-growing population?” or “What are future careers in agriculture?” All research displays should be mounted on a free-standing display board not to exceed 3’ x 4’ when the sides are extended for display. Commercially available “Science Fair Presentation boards” are encouraged”. First place exhibits in each class will be displayed. Second place and sub-sequential exhibits may be displayed based upon space available and judges’/committees’ discretion. Displays should be readable/understandable from a distance of 10 ft. A complete research report should be included with the display in a notebook.

## **SECTION 4305 SCIENCE DISCOVERY PROJECTS**

- The goal of this project and exhibit is to allow 4-H members to:
  - Use the scientific method to gain an understanding of how things work and the variables that affect them.
  - Take an open and creative approach to problem solving.
  - Learn that a successful outcome is based not on personal opinion but on scientific fact.
  - Improve written and visual communication skills
- 4-H members are encouraged to use their 4-H projects as the basis for their scientific research and discovery project. Exhibits should relate to one of the following topics:
  - Behavioral and Social Sciences
  - Biochemistry, Medicine, and Health Sciences
  - Botany and Zoological Sciences
  - Computer Science
  - Earth and Space Sciences
  - Engineering

- Environmental Sciences
- Mathematics
- Physical Sciences

A few resources for finding project ideas are:

The WWW Virtual Library: Science Fairs -

<http://physics.usc.edu/~gould/ScienceFairs/>

Information about Oklahoma Science Fairs -

<https://ossef.zfairs.com/> Displays must be free standing and are limited to 3’ x 3’ (width x depth) when sides are extended. Commercially available “Science Fair Presentation Boards” are encouraged. Counties may enter one exhibit in each class. First place exhibits in each class will be displayed. ### **SECTION 4306 - Design and Construction**

- **Fall 2022 – All Design and Construction projects will be REQUIRED to have the Skill Mastery Sheet securely attached to the project. Use a safety pin and attach directly to the exhibit when at all possible. NEVER attach sheet to a hanger! The sheet MUST be completed by the 4-H member.**
- The skill mastery sheet (<https://4h.okstate.edu/projects/design-and-construction/curriculum-and-patterns.html>) is an education tool to guide project work. Click Sample Technique Cards to find instruction for many of the techniques noted in the skill sheets

- (i.e. facings, zippers, hems, fasteners, etc.).
- Instruction Sheets for the projects listed can be found at: <https://4h.okstate.edu/projects/design-and-construction/project-guide-sheets.html>
  - Fair exhibits have been carefully selected and directed for members to investigate and learn specific skills/information and to demonstrate mastery of these skills/information.
  - The end-product/exhibit is being evaluated on the skills “learned/mastered.” The skill sheet serves as the member’s “personal reflection” and communicates to the judge what was learned. Why is this important? Because in 4-H, the reflection and application of what was learned is more important than the end product/exhibit.
  - The skill sheet is to be used as a planning tool. It is important that each 4-H member take responsibility for the life skill of “learning to learn.” This may require members, leaders and educators to look up terms and learn techniques as part of the educational process.
  - Resources, instructions and project guides are posted online. Members are encouraged to seek out other valid resources which teach proper technique and knowledge in the areas of design and construction.
  - *General Skills to be mastered in project/product in ADC, IDC and HTDC:*
    - **Structural Design:** Construction technique, size, form, color and texture suited to the materials and product end use.
    - **Elements of Design:** The finished product illustrates the member is learning or “mastering” the basic elements of design - line, shape or form, texture, color, and space.
    - **Principles of Design:** The finished product illustrates an awareness and application of the principles of harmony, proportion, balance, rhythm and emphasis adding dimension, interest and/or appeal to the finished product.
    - **Surface Design:** This is any lines, shapes, colors, textures, or materials applied to the product or item’s design that creates an emotional or personal quality, individuality and creative expression without disturbing initial/end purpose/how it is used. Design is that “*something*” which makes the item unique to the individual designer.
  - ✓ **Reports/Descriptions/Expense Sheet/etc. –** Exhibits requiring a report/description/expense sheet of any kind, can be typed or neatly/legible handwritten. Report should be one-two pages. If typed, it must be double spaced using a minimum of 12-point font. **Report MUST be SECURELY**

#### **attached to the exhibit.**

- ✓ A county may enter one (1) exhibit in each class. A 4-H member may enter one (1) exhibit per class.
- ✓ Hangers will not be returned.

**Awards:** Ribbons will be awarded to the top 10 in each class.
